Ultrasonic vibration beautifying instrument
Please read the instruction manual before using.

Ultrasonic cleaning technology

First of all thanks and congratulations on your purchase of silk beauty beauty instrument, because you have taken the skin beautiful and flawless First step. Please, before you experience the many benefits of this new home technology skin cleansing product, please take your time Time to read this manual.

Our new breakthrough skin care products will give the skin a natural healthy glow, so that it can be restored to a smooth young state. Instrument of ultrasonic and ion technology deep clean pores of dirt, ultrasonic and ion into the deep skin nourishment, promote skin more effective absorption of cosmetic. Adhere to the use of the skin can make the skin more fresh and more shiny, is to maintain a young and healthy skin to lay an important foundation.

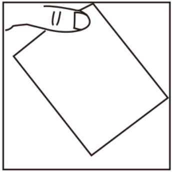
Export: deep clean.
Technique: the face from the top down.

Derived using method:
Directly with cosmetic cotton stained with make-up water or liquid derived wet, facial also slightly wet can and with rubber ring fixed makeup cotton, it is recommended match the thermal sprayed steaming the face side of the steaming the face edge are clean. Use once a week for export cleaning advice.

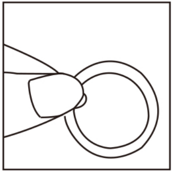
Export: Deep Cleansing (Every ten minutes)

Manipulation as shown below



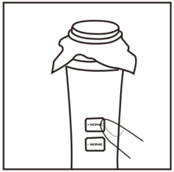
The cotton water wet.

Figure 1



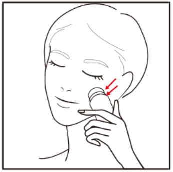
Take out the rubber ring.

Figure 2



As shown in the figure, the method is to use a rubber ring on the instrument, and press the clean button to start the work.

Figure 3



Dirty things with a top-down approach derived from deep pores, once for ten minutes.

Figure 4

Cleaning effect: clean the dirt inside the pores

The skin in the ultrasonic vibration over 3 million times per second under the stimulation of re activation of physiological activities has stopped or very weak, ultrasonic broken pores, positive ion formation loop current adsorption dirt in the pores with a deep cleansing, to achieve, you will discover that you face more and more smooth and delicate.

notice:

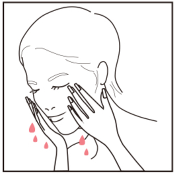
Cleansing Cream collocation is used, please use the operation in accordance with the following statement, put a piece of cotton wet, fixed on the instrument probe, a drop of Cleansing Cream in cotton, will face wet, cleaning instrument for a minute.

Introduction: moist nourishment.
Methods: the face from the bottom up.

Method of use: can be imported into the collocation of their skin car products, advice: emulsion, cream, liquid and other products. With t principle of ultrasonic ion can realize the skin care products into the and bright white moisturizing and firming pulling, refine pores, dilut stain effect. (import suggest two times a week or so)

Import: moist nourishment(Every ten minutes)

Manipulation as shown below



To clean the face.

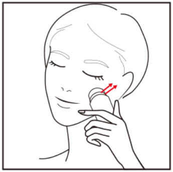
Select the instrument on the skin care, as shown in the figure, press the skin button a second instrument to start work, that is, deep into.

Figure 3



With the bottom-up massage gently to absorb skin and make skin nutrition better.

Figure 4

Deep into effect: white replenishment

Changes of temperature and pressure of air conditioning, pollution, seasonal changes, and the factors of skin aging, slow metabolism, will cause skin moisture loss, the skin coarse, dark dumb, dry lines, causing many skin problems. The use of ultrasound after re activation of cell viability, absorption into the skin nourishment effectively quickly, nourish the skin.

notice:

At the end of the introduction of nursing, apply a facial mask, facial mask to absorb the essence of double effect will be very good.

sebaceous glands in the deep pores, sebum
f sebum and sweat mixed, to

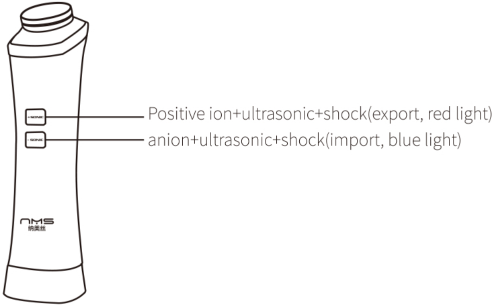
protect the skin, but because of the changing age, the body by the hormone loses balance and sebaceous secretion governed by hormones, continuously secrete sebum, due to excessive secretion blocked pores but, when the pores were stained with bacteria will be inflamed, the acne will grow, therefore, first of all should pay attention to wash the face and then massage oil, ultrasonic clean pores, deep cleaning and ultrasonic micro gap is the principle of science has verified and applied to cleaning all kinds of precision instruments, watches, glasses, cleaning and other projects.

The use of ultrasound to massage slimming effect

Most of the reason of human obesity is excessive nutrients, some is excreted, part of digestion and absorption in the body, which absorbed carbohydrate or protein will turn into fat stored in the body shape, so fat is too much fat. A lot of people can not persevere to exercise to lose weight, so the use of Ultrasound Massager to eliminate fat is a good choice. Due to ultrasound triggered oscillation can enhance the fat and temperature in the ultra high frequency vibration in the water will fat absorption and transmission of ultrasound, so that fat decomposition, then fat from fat ball is crushed into a small ball of fat, fat when the ball is small enough to be through the blood vessel wall, blood was taken out of the body. Ultrasonic beauty apparatus can quickly into the nutrient solution,

due to the self protection ability of human skin, the material is difficult to enter the human body through the skin, so we usually apply the expensive protective essence are not many into the skin, but is excluded, ultrasonic beauty has a strong role in promoting the liquid water nutrition fast import, directly to the skin cells to absorb the excess position, will be excreted to the skin.

The technical principle of instrument



Positive ion+ultrasonic+shock(export, red light)
anion+ultrasonic+shock(import, blue light)

Technical characteristics：

1. Ultrasound: strong ultrasonic power, energy, millions of times per sec
to improve the organization's microseismic massage, The new supersed
the old. and regeneration ability.

2. Positive ion: export, deep cleaning. Methods: from the face down.

3. Anion: introduction, moist nourishment. Methods: the face from the bottom up.

4. Ultrasonic vibration: Shattered pores.

5. Weekly frequency of use is derived: a Monday times; import 2 times a week.

6. A charge for 2 hours, about 90 minutes of continuous use, the blue lig
flashing when charging, full electric blue light lit, the first use of ten minu

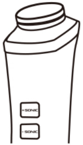
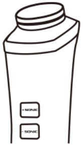
The normal work of the inspection method of ultrasonic instrument

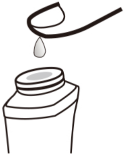
General users can not confirm the ultrasound instrument function in perception and visual work, and continuous output, so in the following way can help to confirm whether the instrument can work normally.



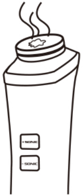
1. Hand instrument, and the massage head is at the level of.



2. Press the switch button clean, red light instrument



3. Put your finger droplets on the probe surface



4. Water said beating machine normal work

Matters needing attention

1. Absolutely can not use eye alignment, the eyes closed ca
2. There are various diseases temporarily not in disease use
3. Wearing a pacemaker installed in the body on the use of
not use.
4. Do not use on metal allergy.
5. Do not use during pregnancy
6. Please do not use the skin when the wound.
7. Not with other beauty equipment used at the same time.
8. Use when you don't wear metal contact lenses, etc..
9. If the use of skin or body feel unwell, please immediately
10. Please use the time required to use.
11. Do not boot when charging.

n not use.

stop using.

Specification

Product model: OT-AC015
Charging voltage: DC5V/1A
Rated voltage: 3.7V ⎓
Rated power: 1.8W
Battery capacity: 1000mAh
Product weight: 115g
Product size: 42x46x178mm

※ This warranty card important instrument for the users to enjoy the warranty service, please safekeeping.

※ Before you return the factory repair, please fill out a complete personal information in the basic information bar, convenient to send back to our factory fixed.

Warranty

- ◆ Door in case of failure in normal use, according to the content of the warranty card to buy a store or our factory enjoy one year warranty service center, but with accessories is beyond the scope of the warranty.
- ◆ Other consumable parts is beyond the scope of the warranty.
- ◆ Please properly keep effective notes and this warranty card when buying, should this product warranty please show me your warranty card and purchase bill.

The range of non-warranty

- ◆ Careless use or error and man-made damage.
- ◆ Improper maintenance by unauthorized personnel repair and remodel cause a malfunction.

- A lightning strike or because of his failure caused by abnormal power supply voltage.
- Non-compliance with this specification precautions listed in the fault caused.
- Force majeure damage caused by natural calamities and fault.

Warm prompt

- Contact the authorized service center to official inquiry.
- Path loss exception: users buy products, please carefully check whether the product is good, no one for the logistics of the damage, such as damage, please contact the logistics providers or retailers, manufacturers are not responsible for the cause of the warranty.
- Users first paid postage supplied parts such as product is in failure, the manufacturer does not accept freight collect.
