

# Female Breast Pump Enhancement Use manual

Thank you for you purchasing BEMT-002 massager,Be sure to read this instruction manual carefully before use so that you can make full and correct use of your massager.Please keep this manual available for future reference after you have read it through.

## 1. Introduction

A Nonsurgical, Scientifically-Proven, Breast Enlargement System Professional, effective, breast enlarging vacuum pump. Our breast pump is for firming and enlarging of underdevelopment breasts with immediate results, quick, and effective vacuum suction for females and males who want to enlarge their breasts. Or for those who want their breast to be firmer.

The device is intended for women. This system is a nonsurgical, scientifically-proven, breast enlargement system. It uses negative

pressure to apply a gentle three-dimensional pulling force that causes the breasts to slowly and naturally grow an average of about one cup size. The method lifts, shapes, and fill the breasts. The procedure creates no scar.tissue, no stretch marks, no asymmetry of breasts, and the results are permanent. (Measurements 22 months after use was stopped show no size loss.

## 2. How does it work

This device is based on a medical principle known as tension-induced growth: The vacuum stretches the breast tissue gently over a sustained period of time. When cells are stretched, they respond both by swelling temporarily and by replicating until, eventually, the cells divide to accommodate stretch force. The new tissue is identical to the woman's original breast tissue, and feels the same both to her and from the "outside."

absorb blackhead

usage: use cosmetic soften  
blackhead , then use it without bra ,  
stick to the skin of face.

Properly kept

## 4. FAQ

Q. Is it Safe?

A. There have been a number of studies and tests, and no damage or risks have been found. Tension-induced growth has been used for over 30 years in other areas of the body, so the science on this is very solid. There are no side effects or health risks.

Q. Is it painful when using the Breast Enlargement Pump?

A. No, If you follow the complete directions, there is no pain or discomfort when using the Breast Pump. Q. Are there any side effects?

A. There are no known side effects, besides breast growth.

Q. How often do I use the Breast Enlargement Pump, and for how long at a time?

A. Using it longer and more often- does produce faster results. Pump to a comfortable pressure and hold that for 10 to 15 minutes on each breast twice a day. Do not over pump, if there is pain or discomfort then release the pressure.

Q. Does your Breast Pump work on males and females?

A. Yes, it works on any breasts, the pump stretches the breast tissue over and over again. It is called soft tissue expansion. It is a lot like working out your muscles repeatedly
