

Sonic Skin Scrubber

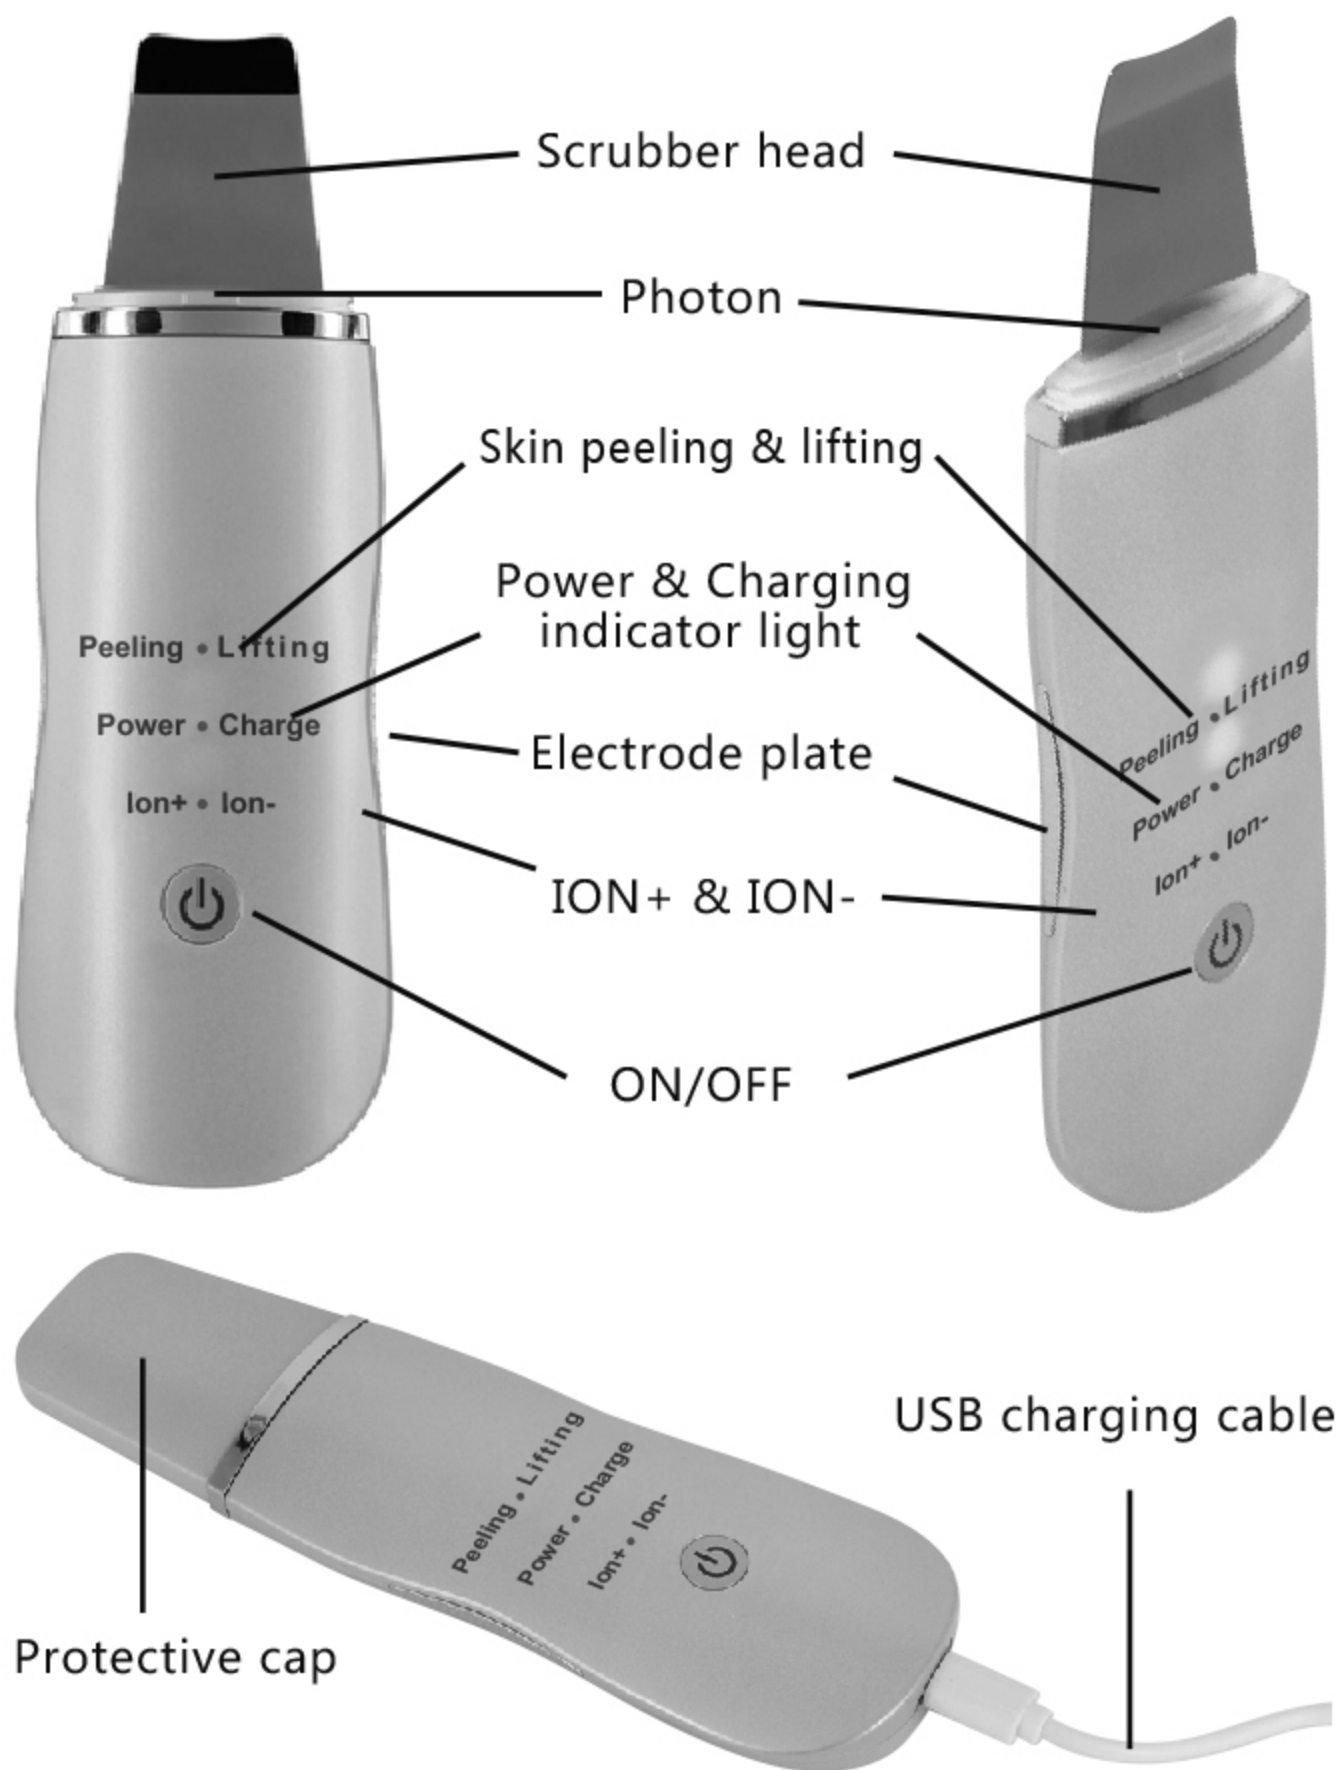

(Rechargeable)

User manual

Creation of Beauty

Please read the instruction very carefully before use.

Working principle

Ultrasound

Ultrasound is a high-level sound wave technology that penetrates deeper than the derma layer. In the skin it increases the temperature of the surrounding tissue, thus increasing oxygenation to the cells, stimulating collagen protein and aiding in the removal of waste products. This is an anti-bacterial cleansing action. It benefits the skin by

stimulating blood circulation, diminishing fine lines and wrinkles, clarifies acne and blemishes and can also eradicate irregular pigmentation and redness.

ION+ & ION-

IONS deeply cleaning the skin of impurities can cause a dull and lifeless appearance. This process happens when negatively charged IONS attract and encapsulate toxins, preparing them to be removed. Following up on this, the positive IONS work to attract the encapsulated impurities from deep skin. Not only this treatment leaves the skin thoroughly clean, but also improves oxygenation and circulation, which promotes cellular health and helps to stave off free-radical damage and premature ageing.

The peeling treatment delicately exfoliates with tiny ultrasonic vibrations removing dead skin cells and dirt from within the skin. The skin feels immediately smoother and softer.

The lifting treatment uses a high frequency programme to help pump serums into the skin to improve their effectiveness.

The second facial treatment uses a high

frequency programme to help pump serums into the skin to improve their effectiveness.

Features:

Ultrasonic action

Instant skin smoothing

Gentle and effective

24,000 vibrations per second

Working modes

Mode 1: Peeling & Lifting (continuous working & pulse working) With 24KHz sonic vibration, the device can help the user remove the dead skin, and the user can choose the working mode according to preference.

Mode 2: ION + & ION- (continuous working & pulse working) With galvanic IONS technology, the device can help skin absorb the nutrition, and lead into deep skin. With ION-, the device can help users get elastic skin, removal wrinkle, tighten pore, improve skin metabolism.

How to use?

Press power button to turn on the unit. Press power button once to select the peeling & lifting continuous working mode; press twice to select the pulse working mode of peeling & lifting.

Press power button three times to select ION+ & ION- continuous working mode; press four times to select the pulse working mode of ION+ & ION-. Turn off the unit by pressing power button for 3 seconds.

Cautions:

This unit is only for its intended purpose (beauty care).

DO NOT immerse this product in water. This product is NOT water resistant, DO NOT place where it can fall or be pulled into water.

This unit may be cleaned by wiping with warm water. Dry thoroughly before using. DO NOT use solvents or detergents. DO NOT place this product near heat sources.

DO NOT use this product if it's not working properly, or if it has been dropped or damaged.

There are no user serviceable parts inside the unit.

Discontinue use immediately if the cord of plug is damaged or becomes hot. It may cause fire, electric shock, short circuit, or burns.

Keep the unit away from Children. DO NOT let them use or play the unit.

Cleaning & Maintenance

Please clean up the device with cotton pads or soft fabric.

DO NOT use sharp objects or metal parts to clean sonic head in order to avoid damage.

Please put the device in a dry and cool place.

Please charge the device in time before power off.

Product specification

Product name: sonic skin scrubber

Power supply: AC100-240V, 50/60HZ

Ultrasound frequency: 24K HZ

Product size: 170*55*15.5mm

Product weight: 94g

Power: 2W
