Thank you for purchasing our company’s product, please read the manual instructions carefully before operation and use the machine in the right way.
What is Pressotherapy?

Pressotherapy uses a controlled-pressure pneumatic massage, and usually takes place in a clinic or spa. The patient lies face up on a bed, and the limb is fitted into a double-walled boot. Air is pumped into several pneumatic chambers of the boot, with varying pressure during the treatment, depending on the characteristics of the limb. Treatment therapy modes automatically adapt according to the patient’s blood pressure reading. The treatment only takes 30 minutes, and patients report feeling more energetic and refreshed. Treatments can be repeated regularly if desired, and can improve cellulite, fluid retention and general detoxification.

Feature Of Pressotherapy

The treatment process is simple and fast, only requiring 30~40 minutes for immediate benefits in relieving feelings of tiredness, jetlag, and general malaise. The treatment is suitable for multiple and regular use and is excellent for:

- Improving sluggish lymphatic drainage and venous return.
- Maintaining normal return circulation.
- Preventing varicose veins and thrombosis.
- Improving heavy, tired legs, oedema and fluid retention
- Cellulite
- obesity
- general detoxification
- Lymphoedema and venous oedemas
- Post-operative oedema
- Post cosmetic surgery care
- Post-partum care
Panel Introduction:

1. Treatment Timer
2-3. Time UP/DOWN
4. Air Pressure INTENSITY
5. Air Pressure INTENSITY button
6. Air Pressure START/STOP
7. Air Pressure MODE
8. Air Pressure MODE button
9. Air Inflation/Deflation button
10. Air Inflation/Deflation TIMER
✧ **Airtubes Connection Figure:**

1. Correctly connect the airtubes to the according outlets **ARM, WAIST, LEG-1, LEG-2**.

2. Connect the power wire, then press power switch to start the machine.

3. Set **TREATMENT TIMER** to the desired time using the ▲ and ▼ arrows.

4. Set desired **Airpressure MODE** using **Airpressure MODE button**.
“1” : ARMS massage mode

“2” : WAIST massage mode

“3” : THIGHS massage mode

“4” : Calves and Feet massage mode

“5” : Arms and Waist massage mode

“6” : Thighs, Calves and Feet mode
“7” : Arms and Thighs mode

“8” : Arms, Calves and Feet mode

“9” : Circulation mode from Arms-Waist-Thighs-calves-Feet

5. Set the **Air Inflation/Deflation TIMER** by pressing **Air Inflation/Deflation button**.

   To set 1 second, meaning both air inflation time and deflation time are 1 second

6. Set the desired **Airpressure INTENSITY** (1~7 levels)

7. Press **START** to begin the airpressure treatment.

8. Press **STOP** to pause the airpressure treatment.

Caution Items:

1. To make sure the safety, the operator has to be near the machine when working, never leave away when it is working.
2. The suggested time of using this machine should not be over 30 minutes.
3. Never pull out the power plug or other connected pipes as the machine is power on.
4. Before doing the therapy, the customers must take down the sharp objects, which would probably puncture the therapy suit and cause serious consequences.
5. Stop using the unit if the suit cracks to avoid the danger of electric shock.
6. People wearing metal decorations can do the therapy with this unit, but the decorations cannot be sharp.
