✧ **Pulse Waveforms Introductions**

✓ **Program 1-Thin Wave:**

This waveform is best for enhancing and building the breast. It can activate the growth of Mammary Gland Cells. To lift and firm the pectoralis major, pectoralis minor muscle and serratus anterior by its electric stimulation so that to build a strong breast support. It would have an obvious effects at promoting the growth of breast, improving the slack and sagged breast.

✓ **Program 2-Thick Wave:**

This waveform can improve blood circulation, promote metabolism, firm and tighten skin.

✓ **Program 3-Dilatational Wave:**

Tightening and relaxing muscle to make it do aerobic exercise in order to decompose and consume fat and redundant energy inside body, prevent the accumulation of fat, then decompose the formative solid fat, keeping it at the free state.

✓ **Program 4-Ups and Downs Wave:**

Forcing the fat to decompose heat, moisture and compressing the plump fat cells, which is further useful for the elimination and consumption of metabolic rubbish, toxin, free fat.

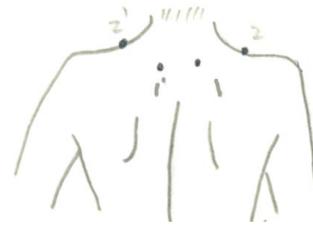

✓ **Program 5-Cycle Waveform P1~P4**

✧ **Recommended Operations:**
