## Introduction

Multi-polar RF handle, Vacuum&RF handle and 40K ultrasound fat-burning handle are currently among the most popular tools for skin care, skin firming, body shaping and anti-ageing. So, this machine is an effective replacement of all the facial and body care programs in beauty salons. Moreover, it is convenient and easy to operate. It solves both skin and body management problems for beauty-seekers. This equipment requires no injection, no medication, and no operation, for which it has no side effects. It is used externally during the whole process and has an immediate effect. RF heats deeper skin layers, stimulates collagen to regenerate and reorganize in dermis, and promotes blood circulation in skin bottom, which can achieve the results of skin firming and anti-aging. Ultrasounds with specific frequencies target those parts in which there are stubborn fat to bring customers amazing results.

## Advantages

1. This 5-in-1 beauty machine is used for facial and body care.
2. The ultrasonic wave can powerfully burn and remove fat, which surpasses liposuction to solve the problems for obese people.
3. There are several hand pieces for treatment. You can use corresponding one based on different needs and different treatment areas.
4. Single hand piece has various functions. The RF has more powerful and even energy release.
5. The perfect combination of ultrasound and radio frequency solves major problems in losing weight. It helps with weight loss and meanwhile firms skin, increases skin elasticity, promotes metabolism, and ultimately strengthen people's constitutions.
6. It adopts the advanced technology of ultrasonic wave fat-burning.
7. It is painless and non-invasive treatment process. Once the treatment is over, customer can go back home and there is no downtime, which means it will not affect customer's life and work.
8. No consumption, low cost and quick returns.
9. Wider treatment range for body and face.
10. Unevenness, bleeding, and swelling will not appear after treatment.
11. Various handles have the energy release of red light, which can dissolve fat and massage body, and accelerate metabolism and sterilize skin at the same time. The effect is remarkable with a higher comfort level.

## Working Principles

### Face RF

RF wave can directly penetrates the skin and uses the resistance formed by the skin to produce energy, which raises the temperature of the bottom layer of the skin. Using the principle of dermis collagen protein tightening and stimulating collagen protein regeneration, it has two therapeutic effects: timely skin firming and lasting collagen protein regeneration.

After treatment, an obvious sense of contraction can be felt immediately at the treatment area, and the effect of skin firming and lifting can be seen about a month later, and the effect will become more and more obvious. The effect of RF treatment can last for about 18 months to 3 years depending on the area of treatment and individual maintenance methods, which, however, may be longer depending on individual maintenance methods. The latest research points out that better results can be achieved after repeated treatment.

## Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to 45 °C ~ 60 °C, it will contract immediately and then the collagen will be stimulated to regenerate. At the same time, biological heat can effectively accelerate the blood flow and make free fatty acid (ffa) released to promote the dissolution of superficial fat to achieve the purpose of tightening and lifting saggy part of the body.

## Eye RF

RF wave can directly penetrates the skin and uses the resistance formed by the skin to produce energy, which raises the temperature of the bottom layer of the skin. Using the principle of dermis collagen protein tightening and stimulating collagen protein regeneration, it has two therapeutic effects: timely skin firming and lasting collagen protein regeneration.

## Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to 45 °C ~ 60 °C, it will contract immediately and then the collagen will be stimulated to regenerate. In the treatment of eyes, it works to heat up the bottom layer of eye skin and promote the growth of collagen, so as to achieve the effect of firming the skin around the eyes, removing bags under the eyes, removing dark circles under the eyes, and relieving bloodshot eyes and fine lines.

## Body RF

Based on the RF thermal effect, a specific radio frequency wave is produced at a specific depth of the skin, which acts directly on the dermis. In this way, it heats the tissue to promote the catabolism of subcutaneous fat, and stimulate the regeneration and reorganization of collagen and elastic fibers at the same time. With the continuous regeneration and reorganization of collagen in the dermis, the saggy skin will be lifted and firmed after several courses of treatment are taken.

### Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make skin get firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to  $45^{\circ}\text{C} \sim 60^{\circ}\text{C}$ , it will contract immediately and then the collagen will be stimulated to regenerate. At the same time, biological heat can effectively accelerate the blood flow and make free fatty acid (ffa) released to promote the dissolution of superficial fat to achieve the purpose of tightening and lifting saggy part of the body.

## 40K

Ultrasonic wave is used here to make human adipose cells take a strong impact and produce friction movement among adipose cells after strong sound waves enter into the human body, which can effectively consume heat and water of cells and shrink adipose cells. In addition, when the sound wave vibrates, it can produce a strong impact on cells. And then the adipose cells will burst instantly, and they will be reduced so as to achieve the effect of fat removal.

**Ultrasound Cavitation:** Tens of thousands of tiny bubbles, namely cavitation bubbles, are produced by vibration of liquid. These bubbles grow in the negative pressure region formed by the longitudinal transmission of ultrasound, which will close rapidly in the positive pressure region to be compressed and stretched under alternating positive and negative pressures. When the bubbles burst, there will be huge instantaneous pressure of up to tens of MPa to hundreds of MPa, and strong vibration and noise will be produced.

**Advantages:** It only aims for low-density adipose tissue for its specific frequency, and protects high-density tissue such as vascular and nerve tissue.

## Vacuum&RF

Massaging skin and muscles with a special vacuum suction handle can effectively improve the humoral fluidity of human cells, and increase the movement of cells to improve skin elasticity. Meanwhile, it can accelerate the blood circulation of microvessels, expel toxins from the body through the normal circulation of the lymphatic system, and reduce the probability of occurrence of adverse conditions such as spots, pigmentation and congestion in various parts of the body. The kneading sensation generated by vacuum suction can increase the tissue activity of skin and muscle, and therefore help to reduce tough tissue and increase the elasticity of skin tissue, so that both body slimming and shaping can be realized at the same time. In addition, the movement of vacuum cup can also stimulate sympathetic nervous system to lower skin sensitivity. The suction and release process of air pressure can not only improve capillary system but also promote the flow between deeper veins and lymphoid gland network to strengthen blood vessels and alleviate the condition of varicose veins.

**Advantages:** it is superior to the previous vacuum working mode which is single and simple. Using different modes for different parts can be more efficient and more effective for slimming and shaping body, and it will never harm human body. Uniquely designed RF tips integrate RF and vacuum as a whole, in which RF and vacuum can exist independently and also are complementary to each other. Compared to the ordinary one-polar RF, it can ideally shape body in a more effective, faster and evener way

### Vacuum Physical Effects

#### 1. Skin layer

The suction and release of air pressure:

- (1) It can improve the fluidity of cells, thus increasing the movement of cells, and can treat diseases related to blood stasis and blood stagnation.
- (2) It can drain excess water of lymph glands and veins.

Effects: redundant water is discharged from tissue fibers.

#### 2. Vascular layer

The suction and release of air pressure:

- (1) Improve the blood circulation of microvessels for the capillary system, and also promote the flow between the deeper veins and lymphatic networks.
- (2) Remove harmful substance in the body.

Effects: Strengthen blood vessels, eliminate toxins and relieve the condition of varicose veins.

#### 3. Fibrous layer

The suction and release of air pressure:

It can deliver two kinds of effects in different tissues (including skin, muscle and so on).

- (1) Repair cells and increase their activity.

- (2) Restore and improve skin elasticity.
  - (3) Stimulate the production of bone collagen and improve skin plumpness.
  - (4) Improve the oxygen absorption of skin and increase the consumption of carbon dioxide.
- Effects: Break the hard fibers of cellulite, and make it more elastic so as to achieve the effect of body-shaping.

#### 4. Nerve layer

The suction and release of air pressure:

It stimulates the surface and deep layer of sympathetic nervous system.

- (1) Lower the sensitivity of skin.
- (2) Restore skin elasticity and help resist tissue fibrosis.

Effects: Repair cells and lower skin sensitivity.

### 3. Dos and Dont's

1. The plug with grounding pin must be used before the instrument is used and the power socket of the instrument is properly grounded.
2. Ensure that the voltage of the instrument is suitable. If the voltage of the local power supply is not stable, we suggest that the user add a voltage regulator with matching power between the mains and the instrument.
3. In order to ensure the treatment effect and normal service life of the instrument, please use the specified parts provided or suggested by the original manufacturer.
4. The instrument should not be placed in damp places or near water sources, and should not be directly exposed to sunlight.
5. Do not place the instrument near a strong heat source, as this may affect the life and normal use of the instrument.
6. Before treatment, please remove all metal objects from the body first, so as to avoid unexpected conditions and influence the curative effect.
7. Please restrain from using the device on eyes, thyroid, parathyroid, testicles, abdomen of pregnant women, and pacemakers.
8. Patients who are suffering from illness should consult with a doctor and gain permission from the doctor before using.
9. Please turn off the power switch of the device, and ensure that the total power supply of the device is turned off before the staff leaves after daily use so as to ensure the safety of using the electrical products.
10. Set the energy at lowest level at the beginning and slowly raise it after the customer adapts to it.
11. The handle can be used alone. Better results will be delivered if one handle works in conjunction with other handles.
12. Make sure the handle is in full contact with skin during operation in case skin is heated

unevenly.

13. The treatment area should be kept moisturized during the operation and do not perform the treatment on dry skin.

14. When the treatment receiver is taking other weight-loss drugs, it is recommended to stop taking them for 1 to 2 months before treatment. Extension of the course of treatment is recommended if the treatment receiver want to use this machine immediately.

15. 40K handle should not be used on head, chest, breast, heart and back.

16. Clean the instrument with normal saline after operation to ensure its cleanliness to prolong its service life.

## **4. Troubleshooting & Solutions**

**1. The instrument cannot be started, and the button light on the back of the instrument does not work?**

A. Make sure the power cord is connected to the socket with normal power supply.

B. Whether the fuse on the back of the instrument is loose or blown.

**2. The machine can be started but there is weakened RF output or no RF output?**

A: Please check whether the handpiece is connected to the machine body properly.

B: the wire in the handpiece is loose or broken.

**3. No suction or very little suction?**

A. Please turn off the instrument and check whether the filter used in the instrument should be replaced

B. Please check whether the cup containing the filter is screwed tight and whether the rubber seal is worn, for air leakage may lead to poor air pressure.

C. If the methods above cannot solve this problem, please contact the instrument dealer for assistance.

**4. I can start the instrument, but the screen shows erroneous message?**

A. Please unplug the power cord behind the instrument and wait for about 1 minute before restarting the instrument.

## **5. FAQs**

**1. Q: How long can I start seeing results of RF treatment?**

A: Normally, you can see the treatment results that day when you take the operation or within one week. Skin collagen tissue is heated and then contracts, and you can obviously feel the sensation of skin being tightened. Because RF works to stimulate subcutaneous tissue to promote collagen regeneration, so the more you take the treatment, the more noticeable the effects will be.

**2. Q: Is RF harmful to skin?**

A: RF treatment is non-surgical operation. It stimulates collagen regeneration at the skin bottom and boosts metabolism, and therefore has no damage to the skin. Local redness and hotness are the normal conditions of accelerated blood circulation, which will be relieved after a moment. So there's no need to worry about that.

**3. Q: How long does the body-firming treatment take?**

A: One treatment session is 60 minutes. We will combine professional techniques and instruments to achieve remarkable results.

**4. Q: What functions does this instrument have?**

A: It has the functions of dissolving fat and shaping body, firming & lifting skin and anti-aging. It can be operated on every part of the body. In terms of facial care, it can form face contour, alleviate wrinkles and saggy skin. In terms of body care, it can reduce regional fatness and build S-shaped curve, and promote metabolism and detoxification of the whole body. Meanwhile, it can also enhance the functions of viscera and solve sub-health problems.

**5. Q: Which one is better in terms of weight loss, liposuction or this machine?**

A: The principle of liposuction is to suck out the excess fat in one part of the body through negative pressure suction so as to achieve the purpose of rapid weight loss. It's a surgical treatment requiring anesthesia and so there is recovery period, which has risks despite its immediate results. However, our instrument is risk-free without side effects. It can not only help you reduce fat but also stimulate collagen regeneration to lift and tighten skin. It can also build perfect curves by lifting skin, and accentuate women's sexual charm.

**6. Q: Will I regain weight after operation?**

A: Ultrasound works to dissolve fat to reduce weight, and users are not prone to regain their weight. Because what's dissolved through ultrasonic treatment is fat, not water. Fat needs a longer period of time to accumulate, so normally people will not regain weight.

**7. Q: Do I need to be on a diet?**

A: Pay attention to what you eat. Because radio frequency and ultrasonic treatment work to dissolve fat and accelerate metabolism. It's best to avoid eating spicy, oily, or fried food in case they affect regular metabolism. Proper workout for sweating helps with fat metabolism process. In such way, the results will be more noticeable.

**8. Q: Does it have side effects on the body?**

A: RF beauty treatment is non-invasive and is one of the most effective and the safest approach to remove wrinkles and shape body. Generally speaking, side effects won't appear. A small number of people may experience transient redness or swelling that will disappear after a few hours. Those with dry skin may experience atrophy after treatment, which will disappear after three days because collagen regeneration will make skin plump up though RF heat can cause moisture loss of skin. Overall, there are no side effects on people's health.

**9. Q: Can ultrasound treatment be performed on every part of the body?**

A: Ultrasound treatment works to rupture fat cells, by which fat is released from cells and then metabolized through lymphatic system. So its power is very high. Heart is sensitive to high frequency sound waves since it is a hollow organ. After being vibrated by sound waves, the heart will reflect the waves due to the different transmission of sound waves by the muscle tissue and the blood in the heart. This force can pull valves away from the heart muscle. If you use the instrument on eyes, it can lead to retinal detachment, so the ultrasound treatment should not be performed on the areas of eyes and heart. (not on the areas of waist, back and chest)

**10. Q: Does ultrasound treatment have side effects on human body?**

A: Ultrasonic beauty treatment is non-surgical and non-invasive program without anaesthesia. It relies on ultrasound (mechanical sound wave) - dissolve fat through cavitation - ultrasound focusing. And the results are fat smash - fat dissolving - skin firming and body sculpting respectively. It only targets low-density fat cells but leaves high-density tissue like blood vessels

intact, and therefore has no side effects on human body. Slight tinnitus will probably occur during the treatment, which is within normal range. So there's no need to worry about that.

**11. Q: Why does tinnitus occur?**

A: It's because ultrasound comes with a high frequency vibration, which could go up to 20kHz. It penetrates into 20mm-deep skin fat layers through ultrasound focusing. Highly intensified ultrasound can cause high-speed friction among fat cells, which can heat and dissolve them. And during the process, sound may be produced so that customer will have the sensation of tinnitus.

**12. Q: What is collagen?**

A: Collagen is a kind of biological macro molecule substance, a kind of white, opaque and non-branched fibrous protein. It can supplement the nutrients needed by all layers of the skin, enhance the collagen activity in the skin, retain moisture, nourish skin, slow down ageing, relieve facial relaxation, provide nutrients for the hair and so on. Collagen is a nutrient that human body must replenish to delay ageing. With the growth of age, collagen will gradually be lost. For women, collagen will begin to decrease since the age of 20. At the age of 25, collagen loss will reach its peak. At the age of 40, the collagen content is less than half of that one has at age of 18. It is the loss of collagen and water that causes the wrinkles on the face of the elderly. The breakage of collagen fibers and elastic fibers will cause skin tissue to be oxidized, atrophied and collapsed. The skin will be dry, wrinkled, flabby and inelastic. Therefore, in order to delay ageing, there must be plenty of collagen.

**13. Q: How does vacuum detoxify?**

A: Vacuum can cause capillary congestion, stimulate cell to increase vitality. The suction and release of pressure during operation can make local pores continue to open and close, which can promote skin breathing, increase the amount of skin oxygen, and speed up waste removal. So it achieves the effects of promoting qi and blood circulation, dispelling cold and damp, dredging meridians and collaterals, clearing toxins, dissipating heat and so on.
