## Brief Introduction

RF and ultrasonic beauty machines are currently the most popular beauty machines that work on tightening, body-shaping and anti-aging. It's an effective replacement of all the facial and body care programs in beauty salons. Moreover, they are convenient and easy to operate. It solves both skin and body management issues for beauty-lovers. This equipment requires no injection, no medication, no operation, thus having no side-effects. It is used externally during the whole process and has an immediate effect. RF machines heats deeper skin layers, stimulates collagen cells to reform in dermis, increases blood circulation in hypodermis, thus achieving skin tightening and anti-aging. Coupled with cold hammer, which soothes skin and shrinks pores, this equipment takes care of your skin in all aspects.

## Facial Tightening & Repairing

### Principles

#### RF Face

Radio frequency works through the circuits formed by electrodes in pair. The optimum frequency of radio frequency biothermal effect is 3 MHz, and the maximum speed of extreme change is 8 million charged particles in tissues per second. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy. During the process, RF promotes the metabolism and proliferation of skin collagen through high electromagnetic wave change, therefore heating up dermis layer of the skin, thus achieving effects like tightening, lifting, wrinkle removal, anti-aging and smooth skin.

### **Biological Effect**

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic.

Every time energy comes into the skin, it feels a temporary sense of heat. This means that collagen has been stimulated to produce fever, resulting in tightening of the skin. While operating sliding, the radio frequency wave emitted by the therapeutic head of the super-frequency wave system, under the cold protection of the epidermis, has acted on the deep dermis through the epidermis, rapidly heating water molecules to produce safe Bio-thermal energy. When the natural friction of collagen tissue is heated up to 45°C~60°C, it will shrink immediately and stimulate the collagen to grow continuously. At the same time, bio-heat can effectively accelerate blood flow in adipocytes, and release free fatty acids (ffa), thereby increasing the dissolution of superficial fat, and achieve the purpose of tightening and lifting the sagging part of the body.

## **BIO**

It uses the photodynamic principle, activates the deep cell, lets the skin carry on the metabolism better. LED colour light can penetrate the skin layer, dilate blood vessels, stimulate blood circulation, accelerate lymph circulation, enhance the role of local tissue blood oxygen saturation. LED light coupled with BIO can make increase cell function, cell vitality, remove free radicals, promotes the fiber cell and endothelial cell proliferation to achieve the effect of repair skin and tender skin and eventually younger skin.

**Biological Effect:** using photodynamic principle, it activates deep cells and boosts skin metabolism. After the light is absorbed by the skin, the light energy is converted into cellular energy, which can relax and strengthen the micro vessels and produce photochemical reactions with the skin -- enzymatic reactions, increasing the content of glycogen and protein, thus promoting the metabolism and synthesis of cells.

## **Cold Hammer**

Cold hammer uses the principle of air conditioning. Special wafer ceramics are used to absorb energy and refrigerate at -5°C in an instant. The method of physical heat

accumulation produced by wafer energy absorption makes one side produce heat up to 40 degrees. The fan discharges excess heat energy and achieves the effect of constant temperature and freezing alternately. It also promotes metabolism, alleviates allergic reaction, shrinks pore, calms skin, whitens and tenders skin.

**Biological effects:** During the cooling process, tissue temperature cools down, blood vessels and veins contract, metabolic rate reduces, cell activity inhibits, peripheral nerve sensitivity reduces, thus having a sedative and soothing effect, counteracting or reducing the symptoms of allergic reaction, such as redness, swelling, and pain, therefore achieving certain effects, such as calming the skin, reducing redness and swelling, shrinking pores and so on.

### **Principles**

#### **Eye RF**

Radio frequency works through the circuits formed by electrodes in pair. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy. During the process, RF promotes the metabolism and proliferation of skin collagen through high electromagnetic wave change, therefore heating up dermis layer of the skin around eye area, thus achieving effects like tightening, lifting, removing wrinkles, under eye bags , fading fine lines and improve couperose skin.

## **Biological Effect**

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic.

Every time energy comes into the skin, it feels a temporary sense of heat. This means that collagen has been stimulated to produce fever, resulting in tightening of the skin. ## Anti-aging around Neck

### Principles

#### RF Face

RF instrument can achieve the effect of tightening skin, lifting skin and shaping face. The optimum frequency of radio frequency biothermal effect is 3 MHz, and the maximum speed of extreme change is 8 million charged particles in tissues per second. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy.

RF wave directly penetrates the skin and generates energy by the resistance action of the skin, which makes the temperature of the skin bottom rise, rapidly and continuously heats the tissue and promotes the growth of collagen in the skin. The principle is tightening collagen and stimulating the proliferation of collagen in the dermis and then is utilized to enhance the tightness and durability in time. After 2-6 months, collagen will gradually proliferate and recombine, making sagging or relaxed skin tight and elevated.

#### Biological Effect

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic.

Every time energy comes into the skin, it feels a temporary sense of heat. This means that collagen has been stimulated to produce fever, resulting in tightening of the skin. While operating sliding, the radio frequency wave emitted by the therapeutic head of the super-frequency wave system, under the cold protection of the epidermis, has acted on the deep dermis through the epidermis, rapidly heating water molecules to

produce safe Bio-thermal energy. When the natural friction of collagen tissue is heated up to 45°C~60°C, it will shrink immediately and stimulate the collagen to continue to grow. At the same time, bio-heat can effectively accelerate blood flow in adipocytes, release free fatty acids (ffa), thereby increasing the dissolution of superficial fat, and achieve the purpose of tightening and lifting the sagging part of the body.

## Body-shaping: Waist & Abdomen

### Principles

#### 40K

Using the sound wave with a frequency of 4 MHz emitted by the strong sound wave head gathering strong sound waves, human adipocytes can produce a strong impact and friction movement between adipocytes after entering the human body, which can effectively consume heat, water and shrink adipocytes. In addition, when sound waves vibrate, it can make adipocytes smaller. Strong crack will come along, cells will burst instantly, adipocytes reduce, so as to achieve the effect of fat removal.

**Cavitation Principle of Ultrasound:** Tens of thousands of tiny bubbles, namely cavitation bubbles, are produced by vibration of liquid. These bubbles grow in the negative pressure region formed by the longitudinal propagation of ultrasound, and close rapidly in the positive pressure region, thus being compressed and stretched under alternating positive and negative pressures. The bubbles will be compressed until burst, which will generate huge instantaneous pressure, generally up to tens of MPa to hundreds of MPa, and produce strong vibration and noise.

**Advantages:** It only aims for low-density adipose tissue in a specific frequency, and protects high-density tissue such as vascular and nerve tissue.

#### Vacuum&RF

Massage skin and muscles with the special negative pressure suction head, which can effectively improve body fluid flow and increase cell activity to achieve effects like improving skin elasticity, accelerating blood circulation of capillary blood vessels, clearing out toxins through lymphatic drainage, and improving and lowering the occurrence of dark spots, hyperpigmentation and blood stasis. The kneading action generated by vacuum suction can increase the tissue activity of skin and muscle, thus helping to reduce the cellular tissue and increase the elasticity of skin tissue, so that both slimming and shaping can be completed at the same time. In addition, vacuum

negative pressure movement can also stimulate the surface and deep sympathetic nervous system, improve skin sensitivity. The suction and release process of air pressure can not only improve the capillary system but also improve the flow between deeper veins and lymph network, strengthen blood vessels, and improve varicose veins.

**Advantages:** breaking through the previous single and simple working mode of negative air pressure, using different modes for different parts can be more efficient and more effective, slimming, shaping, and will never harm human body. Unique RF function head design, RF and negative pressure are relatively independent but complementary metabolic system as a whole, RF has negative pressure, negative pressure has RF, each other as a whole. Compared to the ordinary single-stage RF can be more effective, faster and more uniform perfect remodeling body.

## Body-shaping: Breasts

### Principle

#### RF Body

RF heat effect produces specific radio frequency waves in a specific depth of the subcutaneous skin, which directly acts on the dermis through the skin epidermis, thus heating the tissue, promoting the catabolism of subcutaneous fat, and stimulating the proliferation and reorganization of collagen and elastic fibers. With the continuous regeneration and rearrangement of collagen in the dermis, it can be achieved. Let the flabby skin feel the effect of lifting upward and compacting immediately after the treatment. At the same time, massage can promote breast blood circulation, accelerate blood circulation, dredge congested blood clots and silt, and free fat to the chest under the condition of vibration. At the same time, more nutrients are absorbed into the breasts, which not only prevents atypical lobular hyperplasia and breast cancer, but also enables you to have natural, healthy, beautiful and strong breasts, and makes beautiful female friends more confident.

# **Body-shaping**

## **RF Body**

Through RF thermal heating, it produces specific RF waves in specific subcutaneous depth. And it travels through skin epidermis and works directly on the dermis, thus heating up skin cells, promoting the catabolism of subcutaneous fat, at the same time stimulating collagen and elastic fibers hyperplasia restructuring. With the regeneration and rearrangement of dermis collagen, sagging skin can feel lifted, tightened after treatment.

### **Biological Effect**

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic. RF waves travel through epidermis and directly work on dermis in depth, and quickly heat up water molecules and generate safe thermal energy. When the natural friction of collagen tissue is heated up to 45°C~60°C, it will shrink immediately and stimulate the collagen to continue to grow. At the same time, bio-heat can effectively accelerate blood flow in adipocytes, release free fatty acids (ffa), thereby increasing the dissolution of superficial fat, and achieve the purpose of tightening and lifting the sagging part of the body.

## 5. Troubleshooting & Solutions

### 1. The instrument cannot be started, but the key light on the back of the instrument does not work?

- A. Make sure the power cord is connected to a valid power socket.
- B. Whether the fuse tube on the back of the instrument is loose or burnt out.

### 2. No RF output of the instrument?

A. Please check whether the plug connecting the instrument handle and the body is tightly connected.

B. Please check whether the treatment area has been cleaned. Grease or oil essential oil products may cause poor contact between the treatment handle of the instrument and human body, resulting in no RF output.

### **3. Weakened RF output?**

A. Please check whether the plug connecting the instrument handle and the body is tightly connected.

B. Please check whether non-conductive grease and other substances are stained on the treatment handle, which will cause poor contact and weaken the output.

C. Please check whether the product used is the adaptive product specified by the instrument.

### **4. No suction or very little suction?**

A. Please turn off the instrument and check the filter element specially used for the instrument, which may need to be replaced.

B. Please check the rubber ring of the handle plug, because the rubber ring may be worn and cause air leakage.

C. Please check whether the oil filter cup outside the filter is tightened and whether the rubber ring is worn. It is possible that air leakage at this position may lead to poor air pressure.

D. If the above methods cannot address the issue, please contact the instrument dealer for assistance.

### **5. I can start the instrument, but the screen show's error message?**

A. Please unplug the power plug behind the instrument and wait for about 1 minute before restarting the instrument.

B. If the above methods cannot be handled, please contact the instrument dealer for assistance.

## **6.FAQs**

### **1. Q: How long can I start seeing results of RF treatment?**

A: Under normal circumstances within that day or a week. Skin collagen tissue is heated and produces contractions, and you can obviously feel skin tightening. Because RF works by stimulating subcutaneous tissue and bring about sustainable collagen regeneration, so the more you do it, the more visible effects you shall receive.

### **2. Q: Is RF harmful to skin?**

A: RF treatment falls under the category of non-surgery operation. It stimulates collagen regeneration at the skin bottom and boosts metabolism, therefore has no damage to the skin. Partial redness and fever is the normal phenomenon of

accelerated blood circulation, and will be resolved by oneself after a moment, so there's no need to worry.

**3.Q: How long does the body firming treatment take?**

A: One operation time is 60 minutes. We will combine professional techniques and instruments to achieve remarkable results.

**4.Q: What are all the functions of this instrument?**

A: Dissolve fat, body shaping, smooth skin, firming, lifting, and anti-aging. It can be operated all over the body. In terms of facial care, it can contour facial outline, alleviate wrinkles and saggy skin. In terms of body care, it can reduce regional fatness and build S curve, promote the metabolism and detoxification of the whole body. Meanwhile, it can also enhance the functions of viscera and regulate the sub-health of the body.

**5.Q: Which one is better in terms of weight loss, liposuction or this machine?**

A: The principle of liposuction is to suck out the excess fat in one part of the body through the method of negative pressure suction, so as to achieve the purpose of rapid weight loss on parts of the body. It achieves fast results, requires anesthesia, recovery period. It falls under the category of surgery operation and comes with risks. However, our machine is risk-free and has no side effects. While losing weight, it can stimulate collagen regeneration to lift and tighten skin. By lifting, it can also shape perfect curves and accentuate women's natural charm.

**6.Q: Will I experience rebound after operation?**

A: RF works by dissolving fat to reduce weight, and are not prone to rebound. Because what's dissolved through RF treatment is fat, not water. The formation of fat needs a longer period of time to accumulate, so it is not prone to rebound.

**7.Q: Do I need to be on a diet?**

A: Pay attention to what you eat. Because radio frequency and ultrasonic treatment end with blasting adipose and accelerated metabolism. It's best to avoid eating spicy, oily, or fried food, to avoid affecting regular metabolism. Also proper workout and sweating help with the process, in a way weight loss will be more visible as well.

**8.Q: Does it have any side effects on the body?**

A: RF beauty treatment is non-invasive and so far the most safe and effective method to remove wrinkles and shape body. Generally speaking side effects won't appear. A small number of people may experience transient redness or swelling that will disappear after a few hours. Those with dry skin may experience atrophy after the initial treatment. The skin will lose moisture due to RF heat. However, the skin will become plump at the beginning of collagen regeneration and these symptoms will disappear after three days. There are no side effects on health.

**9.Q: Can RF instrument be used for chest shaping?**

A: As the growth of age and female physiology period, sub-health state, gravity, stimulation during lactation, a large number of nutrition loss... All the above will cause collagen loss, decreased blood flow, damaged elastic tissue, flabby ligament gland, and prolapsed breasts. Through RF energy conduction, collagen protease can be promoted to repair elastic tissue and ligament glands, thus achieving the effect of chest lifting and shaping.

**10. Q: Can ultrasound be operated all over the body?**

A: Ultrasonic cavitation ruptures fat cells and causes mechanical disruption of fat cell membrane. Liquefied fat cells then cleared away by metabolic pathways. Our heart is a hollow organ, and sensitive to high frequency sound waves. Back and forth reflex occur due to the fact that muscle tissue and blood in the heart do not conduct sound waves in the same way. The reflex force can detach cardiac valves from cardiac muscles. If directed at the eye, it can cause retinal detachment. In a word, avoid eye and heart area when using ultrasonic beauty device. (It is also advised not to use it on waist, back and chest.)

**11.Q: Does ultrasound have side effects on human body?**

A: Ultrasonic beauty machine requires no surgery, no opening up and no anesthesia, therefore is indeed non-invasive. It relies on ultrasound (mechanical sound wave) - blast fat through cavitation - ultrasound focusing. And the results are fat smash - fat dissolving - skin firming and body sculpting respectively. It only targets at low density fat cells while leaving high density tissues like blood vessels intact, therefore having no side effects on human body. Slight tinnitus might appear to happen during the treatment, which is within normal range so there's no need to worry.

**12.Q: Why does tinnitus occur?**

A: It's because ultrasound comes with a high frequency vibration, which could go up to 20kHz. It also goes deep into skin fat layers, which could go down to 20mm below epidermis. Highly intensifies ultrasound cause high speed friction among fat cells, resulting in them bursting and heating up, and eventually emulsified. And during the process, ultrasound can cause microvibration to the tissue that make us feel like as "tinnitus".

**13.Q: What is collagen?**

A: Collagen is a kind of biological macromolecule substance, a kind of white, opaque and non-branched fibrous protein. It can supplement the nutrition needed by all layers of the skin, enhance the collagen activity in the skin, lock moisture, nourish the skin, delay aging, beautify, relieve facial relaxation, provide nutrients for the hair and so on. Collagen is a nutrient that human body must replenish to delay aging. With the growth of age, collagen will gradually be lost. At the age of 20 , women have begun to age, collagen gradually decrease. At the age of 25, collagen loss reaches its peak. At the age of 40 , the content is less than half of which one has at age 18. It is the loss of

collagen and water that causes the wrinkles on the face of the elderly. The breakage of collagen fibers and elastic mesh will cause skin tissue to be oxidized, atrophied and collapsed. The skin will be dry, wrinkled, flabby and inelastic etc,. Therefore, in order to delay aging, collagen must be supplemented.

**14. Q: Why do I need breast maintenance?**

A: The lymph nodes of bosom rank the top among other parts of the body, which also lead to toxin accumulation very easily , and urbanite life rhythm is very fast now, working pressure is very big, which can bring about the hyperplasia of different level. The saying goes that bosom is the cradle of children, the garden of the woman, the symbol of female identity! Breast maintenance can make your figure more beautiful, add scores for your whole temperament, thus turn head rate increases 10 times certainly! Good figure and temperament will also ensure husband's loyalty!

The evolution of breast cancer: breast milk residual , secretions, toxins -- nodules and blockages -- lobular hyperplasia, ductal hyperplasia, breast hyperplasia -- duct blockage and adhesion -- fibroma, breast cyst -- breast cancer.

**15.Q: Why do I need hip maintenance?**

A: Because it can help the body lymphatic system discharge poison, improve the gynaecological disease, and avoid harm brought by buttock blockage. Hip impassability surely bring about gynaecological issues. What's inside buttocks is pelvic cavity, bowel. It connects daimai, lumbar vertebra, sciatic nerve from above, uterus ovary, uterine adenexa in front, anus, vagina, inguinal lymphatic from below.

If suffering from squeeze of shangjiao and xiaojiao meridian channels, hip would be most vulnerable to cold, wet and blood stasis. When hip is affected by cold, it can cause meridian contraction of hips, dysmenorrhea, irregular menstruation, dark menstruation color , clot, deterred blood flow and meridian channels. It also affects fertility.

**16.Q: How does negative pressure detoxify?**

A: Negative pressure can congest capillary, stimulate cell to increase vitality. The suction and release of pressure during operation can make local pores continue to open and close, therefore promote skin breathing, increase the amount of skin oxygen, speed up the elimination of waste. So it achieves the effects of promoting qi and blood circulation, dispelling coldness and dampness, dredging channels and collaterals, clearing toxins,heat and so on.

**Suggested Treatment:**

Ten treatments account for one full course. After one treatment, the skin will be firm, tender, delicate and smooth, and the eyes will be elevated to accelerate the blood circulation and lymph circulation of the eyes. After one course, it lightens fine lines, dark circles under the eyes and brightens the skin. After two courses, the overall skin is smooth, firm and elastic, and the double chin is improved. Three courses help prevent and delay skin aging, relaxation and sagging, and restore skin to its youthful state.
