# Part I

## Introduction

RF and ultrasonic beauty machines are currently the most popular beauty machines that work on tightening, body-shaping and anti-aging. It's an effective replacement of all the facial and body care programs in beauty salons. Moreover, they are convenient and easy to operate. It solves both skin and body management issues for beauty-lovers. This equipment requires no injection, no medication, no operation, thus having no side-effects. It is used externally during the whole process and has an immediate effect. RF machines heats deeper skin layers, stimulates collagen cells to reform in dermis, increases blood circulation in hypodermis, thus achieving skin tightening and anti-aging. Coupled with cold hammer, which soothes skin and shrinks pores, this equipment takes care of your skin in all aspects.

## Facial Anti-aging

### Principles

#### RF

Radio frequency can alternate electrical polarities of biological tissues on the treated area millions of times per second and change directions in the same frequency concurrently. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy, which stimulates the dermis to produce more collagen and fill up the gap of the lost collagens, therefore plumping up the skin and revive elasticity.

During multipolar RF treatment, polarities alternate consecutively, which produces a higher intensity energy release, heats up the bottom layers of skin. Through fast and consecutive heating of tissues, collagen regeneration is boosted, thus having a more visible result in a shorter period of time. It also comes with a wider and more intensifies treatment scope.

### **Biological Effect**

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic.

Every time energy comes into the skin, it feels a temporary sense of heat. This means that collagen has been stimulated to produce fever, resulting in tightening of the skin. While operating sliding, the radio frequency wave emitted by the therapeutic head of the super-frequency wave system, under the cold protection of the epidermis, has acted on the deep dermis through the epidermis, rapidly heating water molecules to produce safe Bio-thermal energy. When the natural friction of collagen tissue is heated up to 45°C~60°C, it will shrink immediately and stimulate the collagen to grow continuously. At the same time, bio-heat can effectively accelerate blood flow in adipocytes, and release free fatty acids (ffa), thereby increasing the dissolution of superficial fat, and achieve the purpose of tightening and lifting the sagging part of the body.

### **BIO**

The combination of micro-current and inductive current has a strong cosmetic effect. The function of microcurrent is to increase the synthesis of ATP (adenosine triphosphate), which is five times higher than usual. It can provide muscle and body energy, make you look energetic; Improve the permeability of cells, 30% - 40% higher than usual, help the human body better absorb nutrients and water, oxygen-containing blood, etc., and remove waste and toxins as soon as possible. Promote the synthesis of muscle fibers, 68% higher than usual, keep the skin moist, soft, compact and lustrous; Increase the level of collagen synthesis to 73%, reduce wrinkles, make the skin more soft, elastic and lustrous. The function of induced

current is to balance cell's electric potential, increase cell ATP, accelerate blood circulation, improve collagen synthesis and increase skin elasticity.

BIO Cell Activation Instrument, which imitates human biological current, enters muscle cells through skin, stimulates ATP contained in cells, and restores normal operation and function of cells. It collects the latest technology to shape facial contour, thin face, reduce double chin and wrinkles and shrink pores for customers in the shortest time possible. BIO makes facial muscles tight and delicate, and rosy cheeks will appear naturally . It is more effective on loose skin, so as to achieve the goal of shaping a beautiful face.

### **RF Face**

Radio frequency can alternate electrical polarities of biological tissues on the treated area millions of times per second and change directions in the same frequency concurrently. ## **Ultrasound: Face**

Ultrasonic facial beauty instrument is based on the theory of high frequency vibration. It reaches deep into the subcutaneous tissues, 4-6 mm to be exact, with the strong vibration wave of 2.8MHz. With its high energy and permeability, it vibrates tissues in every layers of your skin, exporting oil and dirt from pores. Also, it changes cells volumes so as to improve blood circulation and stimulates proliferation of cells, making it lustrous and elastic. Moreover, thanks to its high frequency vibration induced warm effect, it helps better absorption of nutrients into the skin at a higher speed.

## **Effects**

1. Tighten skin, brighten the overall skin color.
2. Channel nutrition deep into skin and moisturize skin.
3. Increase skin elasticity and refine skin.
4. Regulate water-oil imbalance and promote nutrients' absorption.

## Facial Repair for Sensitive Skin

### Principles

### Cold Hammer

Cold hammer uses the principle of air conditioning. Special wafer ceramics are used to absorb energy and refrigerate at  $-5^{\circ}\text{C}$  in an instant. The method of physical heat accumulation produced by wafer energy absorption makes one side produce heat up

to 40 degrees. The fan discharges excess heat energy and achieves the effect of constant temperature and freezing alternately. It also promotes metabolism, alleviates allergic reaction, shrinks pore, calms skin, whitens and tenders skin.

### **Biological Effects**

During the cooling process, tissue temperature cools down, blood vessels and veins contract, metabolic rate reduces, cell activity inhibits, peripheral nerve sensitivity reduces, thus having a sedative and soothing effect, counteracting or reducing the symptoms of allergic reaction, such as redness, swelling, and pain, therefore achieving certain effects, such as calming the skin, reducing redness and swelling, shrinking pores and so on.

### **Effects**

1. Relieve facial redness, acne, allergy and other symptoms.
2. Calm and soothe the skin and reduce skin breakouts.
3. Refine pores, relieve couperose, minimize enlarged pores.
4. Tighten and lift skin and enhance skin elasticity.
5. Improve sagging and lax skin and reduce wrinkles.
6. Help skin absorb nutrients, lock nutrients in the meantime and smooth skin.
7. Strengthen skin resistance and repair fragile skin.

### **Applicable Range**

1. Those with sensitive, acne-prone skin. Those who are having an allergic reaction and prone to redness and swelling.
2. Those with flabby, sagging skin and lack of elasticity.
3. Those with fine lines, hyperpigmentation, uneven, dry and dull skin.

2. Strengthen moisturizing and sunscreen.
3. Do not soak in hot springs, steam saunas or exercise strenuously, etc. within three days.
4. Use facial masks at least three times a week.
5. Spicy, greasy food should be avoided. Staying up late, smoking and drinking are prohibited. More vegetables, fruits, and less greasy food.
6. Avoid food that will cause '3 Hs'(high blood pressure, high cholesterol and high blood sugar), less greasy food is advised.

## Anti-aging around Eyes

### Principles

#### RF Eyes

RF works through the circuits formed by electrodes in pair. The optimum frequency of radio frequency biothermal effect is 3 MHz, and the maximum speed of extreme change is 8 million charged particles in tissues per second. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy. During the process, RF promotes the metabolism and proliferation of skin collagen through high electromagnetic wave change, therefore heating up dermis layer of the skin, thus achieving effects like tightening, lifting, wrinkle removal, anti-aging and smooth skin.

#### BIO

The combination of micro-current and inductive current has a strong cosmetic effect. The function of microcurrent is to increase the synthesis of ATP (adenosine triphosphate), which is five times higher than usual. ## Anti-aging on Neck

### Principles

#### RF

RF instrument can achieve the effect of tightening skin, lifting skin and shaping face. The optimum frequency of radio frequency biothermal effect is 3 MHz, and the maximum speed of extreme change is 8 million charged particles in tissues per second. In the rapid change of electrodes, the dermal tissue naturally resists the radio frequency current and generates thermal energy.

RF wave directly penetrates the skin and generates energy by the resistance action of the skin, which makes the temperature of the skin bottom rise, rapidly and continuously heats the tissue and promotes the growth of collagen in the skin. The principle is tightening collagen and stimulating the proliferation of collagen in the dermis and then is utilized to enhance the tightness and durability in time. After 2-6 months, collagen will gradually proliferate and recombine, making sagging or relaxed skin tight and elevated.

#### Biological Effect

Radio frequency can shake millions of high frequency radio waves per second, penetrate the epidermis, directly act on the dermis, deep heat collagen cells, stimulate the growth of collagen fibers, so that it has a large number of new collagen support, making the skin more compact and elastic.

Every time energy comes into the skin, it feels a temporary sense of heat. This means that collagen has been stimulated to produce fever, resulting in tightening of the skin. While operating sliding, the radio frequency wave emitted by the therapeutic head of the super-frequency wave system, under the cold protection of the epidermis, has acted on the deep dermis through the epidermis, rapidly heating water molecules to produce safe Bio-thermal energy. When the natural friction of collagen tissue is heated up to  $45^{\circ}\text{C}\sim 60^{\circ}\text{C}$ , it will shrink immediately and stimulate the collagen to continue to grow. At the same time, bio-heat can effectively accelerate blood flow in adipocytes, release free fatty acids (ffa), thereby increasing the dissolution of

superficial fat, and achieve the purpose of tightening and lifting the sagging part of the body.

## **Effects**

# Body-shaping: Waist & Abdomen

## Principles

### Ultrasound Body

Using the sound wave with a frequency of 4 MHz emitted by the strong sound wave head gathering strong sound waves, human adipocytes can produce a strong impact and friction movement between adipocytes after entering the human body, which can effectively consume heat, water and shrink adipocytes. In addition, when sound waves vibrate, it can make adipocytes smaller. Strong crack will come along, cells will burst instantly, adipocytes reduce, so as to achieve the effect of fat removal.

**Cavitation Principle of Ultrasound:** Tens of thousands of tiny bubbles, namely cavitation bubbles, are produced by vibration of liquid. These bubbles grow in the negative pressure region formed by the longitudinal propagation of ultrasound, and close rapidly in the positive pressure region, thus being compressed and stretched under alternating positive and negative pressures. The bubbles will be compressed until burst, which will generate huge instantaneous pressure, generally up to tens of MPa to hundreds of MPa, and produce strong vibration and noise.

**Advantages:** It only aims for low-density adipose tissue in a specific frequency, and protects high-density tissue such as vascular and nerve tissue.

### Vacuum RF

Radio frequency releases energy, acting directly on the dermis through the skin epidermis, heating directly from the inside of the human body. The heat energy reaches 40-60 degrees. Through the biothermal effect, the blood circulation and lymphatic circulation in the uterus are enhanced, and metabolism of adipose tissue is fast. Thus, the health of uterus can be improved, the menstrual bleeding can be

regulated to normal , and it also helps with cold womb.

### 1. Skin layer

- (1) It can improve the fluidity of cells, thus increasing the movement of cells, and can treat diseases related to blood stasis and blood stagnation.
- (2) Draining lymph glands and veins.

### 2. Vascular layer

The suction and release of air pressure:

- (1) Improve the blood circulation of microvessels, not only for the capillary system, but also the flow between the deeper veins and lymphatic networks.
- (2) Remove excess toxins in the body.

Effects: Strengthen blood vessels, eliminate toxins and relieve varicose veins.

### 3. Fibrous layer

The suction and release of air pressure:

- (1) Repair cell tissue, increase its activity.
- (2) Stimulate the production of bone collagen and improve skin plumpness.
- (3) Improve the oxygen support capacity of skin and increase the consumption of carbon dioxide.

**Experiment:** Put a piece of pork ointment on the fat of the unoisetion cavitation 2.0 probe, it was dissolved gradually by ultrasonic vibration.

## Vacuum Slimming

Massage skin and muscles with the special negative pressure suction head, which can effectively improve body fluid flow and increase cell activity to achieve effects like

improving skin elasticity, accelerating blood circulation of capillary blood vessels, clearing out toxins through lymphatic drainage, and improving and lowering the occurrence of dark spots, hyperpigmentation and blood stasis. The kneading action generated by vacuum suction can increase the tissue activity of skin and muscle, thus helping to reduce the cellular tissue and increase the elasticity of skin tissue, so that both slimming and shaping can be completed at the same time. In addition, vacuum negative pressure movement can also stimulate the surface and deep sympathetic nervous system, improve skin sensitivity. The suction and release process of air pressure can not only improve the capillary system but also improve the flow between deeper veins and lymph network, strengthen blood vessels, and improve varicose veins.

**Advantages:** breaking through the previous single and simple working mode of negative air pressure, using different modes for different parts can be more efficient and more effective, slimming, shaping, and will never harm human body. Unique RF function head design, RF and negative pressure are relatively independent but complementary metabolic system as a whole, RF has negative pressure, negative pressure has RF, each other as a whole. Compared to the ordinary single-stage RF can be more effective, faster and more uniform perfect remodeling body.

17. Clean the instrument with normal saline after operation to ensure its cleanliness and hygiene and prolong its service life.

## 5. Troubleshooting & Solutions

### 1. The instrument cannot be started, but the key light on the back of the instrument does not work?

- A. Make sure the power cord is connected to a valid power socket.
- B. Whether the fuse tube on the back of the instrument is loose or burnt out.

### 2. No RF output of the instrument?

- A. Please check whether the plug connecting the instrument handle and the body is tightly connected.
- B. Please check whether the treatment area has been cleaned. Grease or oil essential oil products may cause poor contact between the treatment handle of the instrument and human body, resulting in no rf output.

### 3. Weakened RF output?

- A. Please check whether the plug connecting the instrument handle and the body is tightly connected.
- B. Please check whether non-conductive grease and other substances are stained on the treatment handle, which will cause poor contact and weaken the output.
- C. Please check whether the product used is the adaptive product specified by the instrument.

### 4. No suction or very little suction?

- A. Please turn off the instrument and check the filter element specially used for the instrument, which may need to be replaced.
- B. Please check the rubber ring of the handle plug, because the rubber ring may be worn and cause air leakage.
- C. Please check whether the oil filter cup outside the filter is tightened and whether the rubber ring is worn. It is possible that air leakage at this position may lead to poor air pressure.
- D. If the above methods cannot address the issue, please contact the instrument dealer for assistance.

### 5. I can start the instrument, but the screen show's error message?

A. Please unplug the power plug behind the instrument and wait for about 1 minute before restarting the instrument.

B. If the above methods cannot be handled, please contact the instrument dealer for assistance.

## 6.FAQs

### 1. Q: How long can I start seeing results of RF treatment?

A: Under normal circumstances within that day or a week. Skin collagen tissue is heated and produces contractions, and you can obviously feel skin tightening. Because RF works by stimulating subcutaneous tissue and bring about sustainable collagen regeneration, so the more you do it, the more visible effects you shall receive.

### 2. Q: Is RF harmful to skin?

A: RF treatment falls under the category of non-surgery operation. It stimulates collagen regeneration at the skin bottom and boosts metabolism, therefore has no damage to the skin. Partial redness and fever is the normal phenomenon of accelerated blood circulation, and will be resolved by oneself after a moment, so there's no need to worry.

### 3.Q: How long does the body firming treatment take?

A: One operation time is 60 minutes. We will combine professional techniques and instruments to achieve remarkable results.

### 4.Q: What are all the functions of this instrument?

A: Dissolve fat, body shaping, smooth skin, firming, lifting, and anti-aging. It can be operated all over the body. In terms of facial care, it can contour facial outline, alleviate wrinkles and saggy skin. In terms of body care, it can reduce regional fatness and build S curve, promote the metabolism and detoxification of the whole body. Meanwhile, it can also enhance the functions of viscera and regulate the sub-health of the body.

### 5.Q:Which one is better in terms of weight loss, liposuction or this machine?

A: The principle of liposuction is to suck out the excess fat in one part of the body through the method of negative pressure suction, so as to achieve the purpose of rapid weight loss on parts of the body. It achieves fast results, requires anesthesia, recovery period. It falls under the category of surgery operation and comes with risks. However, our machine is risk-free and has no side effects. While losing weight, it can stimulate collagen regeneration to lift and tighten skin. By lifting, it can also shape perfect curves and accentuate women's natural charm.

### 6.Q: Will I experience rebound after operation?

A: RF works by dissolving fat to reduce weight, and are not prone to rebound. Because what's dissolved through RF treatment is fat, not water. The formation of fat needs a longer period of time to accumulate, so it is not prone to rebound.

**7.Q: Do I need to be on a diet?**

A: Pay attention to what you eat. Because radio frequency and ultrasonic treatment end with blasting adipose and accelerated metabolism. It's best to avoid eating spicy, oily, or fried food, to avoid affecting regular metabolism. Also proper workout and sweating help with the process, in a way weight loss will be more visible as well.

**8.Q: Does it have any side effects on the body?**

A: RF beauty treatment is non-invasive and so far the most safe and effective method to remove wrinkles and shape body. Generally speaking side effects won't appear. A small number of people may experience transient redness or swelling that will disappear after a few hours. Those with dry skin may experience atrophy after the initial treatment. The skin will lose moisture due to RF heat. However, the skin will become plump at the beginning of collagen regeneration and these symptoms will disappear after three days. There are no side effects on health.

**9. Q: Can ultrasound be operated all over the body?**

A: Ultrasonic cavitation ruptures fat cells and causes mechanical disruption of fat cell membrane. Liquefied fat cells then cleared away by metabolic pathways. Our heart is a hollow organ, and sensitive to high frequency sound waves. Back and forth reflex occur due to the fact that muscle tissue and blood in the heart do not conduct sound waves in the same way. The reflex force can detach cardiac valves from cardiac muscles. If directed at the eye, it can cause retinal detachment. In a word, avoid eye and heart area when using ultrasonic beauty device. (It is also advised not to use it on waist, back and chest.)

**10.Q: Does ultrasound have side effects on human body?**

A: Ultrasonic beauty machine requires no surgery, no opening up and no anesthesia, therefore is indeed non-invasive. It relies on ultrasound (mechanical sound wave) - blast fat through cavitation - ultrasound focusing. And the results are fat smash - fat dissolving - skin firming and body sculpting respectively. It only targets at low density fat cells while leaving high density tissues like blood vessels intact, therefore having no side effects on human body. Slight tinnitus might appear to happen during the treatment, which is within normal range so there's no need to worry.

**11.Q: Why does tinnitus occur?**

A: It's because ultrasound comes with a high frequency vibration, which could go up to 20kHz. It also goes deep into skin fat layers, which could go down to 20mm below epidermis. Highly intensifies ultrasound cause high speed friction among fat cells, resulting in them bursting and heating up, and eventually emulsified. And during the

process, ultrasound can cause microvibration to the tissue that make us feel like as “tinnitus”.

**12.Q: What is collagen?**

A: Collagen is a kind of biological macromolecule substance, a kind of white, opaque and non-branched fibrous protein. It can supplement the nutrition needed by all layers of the skin, enhance the collagen activity in the skin, lock moisture, nourish the skin, delay aging, beautify, relieve facial relaxation, provide nutrients for the hair and so on. Collagen is a nutrient that human body must replenish to delay aging. With the growth of age, collagen will gradually be lost. At the age of 20 , women have begun to age, collagen gradually decrease. At the age of 25, collagen loss reaches its peak. At the age of 40 , the content is less than half of which one has at age 18. It is the loss of collagen and water that causes the wrinkles on the face of the elderly. The breakage of collagen fibers and elastic mesh will cause skin tissue to be oxidized, atrophied and collapsed. The skin will be dry, wrinkled, flabby and inelastic etc,. Therefore, in order to delay aging, collagen must be supplemented.

**13.Q: How does negative pressure detoxify?**

A: Negative pressure can congest capillary, stimulate cell to increase vitality. The suction and release of pressure during operation can make local pores continue to open and close, therefore promote skin breathing, increase the amount of skin oxygen, speed up the elimination of waste. So it achieves the effects of promoting qi and blood circulation, dispelling coldness and dampness, dredging channels and collaterals, clearing toxins,heat and so on.

**Suggested Treatment:**

10 treatments account for one full course. After one time, the skin will be firm and tender, providing the skin with needed nutrition. After a course of treatment, the skin is lifted and shiny. After 2 courses, the skin is smooth and plump, and the outline gradually becomes clear. After 3 courses, it can achieve effects such as prevent and delay skin aging, improve sagging and loose skin, and increase collagen in the bottom of skin, making skin smooth, firm and glowing.

Ten treatments account for one full course. After one treatment, the skin will be firm, tender, delicate and smooth, and the eyes will be elevated to accelerate the blood circulation and lymph circulation of the eyes. After one course, it lightens fine lines, dark circles under the eyes and brightens the skin. After two courses, the overall skin is smooth, firm and elastic, and the double chin is improved. Three courses help prevent and delay skin aging, relaxation and sagging, and restore skin to its youthful state.
