User Manual

SD-45S2SB

Preface

Dear Users,

We're pleased to present to you our latest 6-in-1 comprehensive beauty machine featuring RF&Suction, EMS&EL, RF&Suction Body, RF&Ultrasound and Lipo Laser. It is a professional beauty machine, which needs to be handled by professionals with proper training. Any improper use will result in adverse outcomes. Therefore, we advise any personnel to read this manual thoroughly and follow the instructions strictly before operation.

We believe our quality product will bring in good returns on your end. Also, you can count on our worry-free after-sales service.

Thank you!

Part I

Introduction

With the combination of RF&Suction, EMS&EL, RF&Suction Body, RF&Ultrasound and Lipo Laser, this machine is among the most popular beauty machines for skin care, skin firming, body shaping and anti-ageing. So, this machine can replace all face and body care treatments in beauty salons. Moreover, it is convenient and easy to operate. It solves both skin and body management problems for beauty-seekers. This equipment requires no injection, no medication, and no operation, for which it has no side effects. It is used externally during the whole process and has an immediate effect. RF heats deeper skin layers, stimulates collagen to regenerate and reorganize in dermis, and promotes blood circulation at skin bottom, which can achieve the results of skin firming and anti-aging. Laser has strong penetration, which can reach the bottom of fat layer and then heat and dissolve fat. It is safe and painless without side effects. Ultrasonic waves with specific frequencies target those parts in which there are stubborn fat to bring customers amazing results.

Advantages

1. 6-in-1 beauty machine for facial and body care.

2. The ultrasonic wave can powerfully burn and remove fat, which surpasses liposuction to solve the problems for obese people.

3. Various working heads can be chosen to be used in different parts according to different needs.

4. One working handle has various functions. The RF handle has more powerful and evener energy release.

5. The perfect combination of ultrasound and radio frequency solves major problems in losing weight. It helps with weight loss and meanwhile firms skin, increases skin elasticity, promotes metabolism, and ultimately strengthens one's constitution.

6. It adopts the advanced technology of ultrasonic wave fat-burning. It is painless and noninvasive treatment process. Once the treatment is over, customer can go back home and there is no recovery period, which will not bring any inconvenience to life and work.

7. No consumption, low cost and quick returns.

8. Wider treatment range and remarkable results.

9. Unevenness, bleeding, and swelling will not appear after treatment.

10. Various handpieces have the energy release of red LED light, which can dissolve fat and massage body, and accelerate metabolism and sterilize skin at the same time. The effect is remarkable with a higher comfort level.

11. It can dissolve fat in a safe and painless way, leaving skin smooth without scars.

12. The handle design is based on ergonomics. It is comfortable to hold it. And larger handles can be used to treat large-size areas.

Working Principles

RF&Suction

Massaging skin and muscles with a special vacuum suction handle can effectively improve the humoral fluidity of human cells, and increase the movement of cells to improve skin elasticity. Meanwhile, it can accelerate the blood circulation of microvessels. In addition, the movement of vacuum cup can also stimulate sympathetic nervous system to lower skin sensitivity. The suction

and release process of air pressure can not only improve capillary system but also relieve saggy condition of facial skin and then firm and lift skin.

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make skin get firmer and more elastic.

Advantage: Uniquely designed RF tips integrate RF and vacuum as a whole, in which RF and vacuum can exist independently and also are complementary to each other. Compared to the ordinary RF, it can ideally shape body in a more effective, faster and evener way. The added red LED light can help kill bacteria and activate cells to increase skin's elasticity.

EMS&EL EMS

EMS is the abbreviation of electronic muscle stimulation, which is known as muscle electrical stimulation technology, and also known as muscle movement technology. The simple explanation is that under normal circumstances, muscles begin to make movements after receiving signals from the brain, while EMS directly conveys the signal to the muscle through current stimulation, and then causes the muscle to make passive movements, thus leaving skin firmed and making facial contour more pronounced.

EL

Electroporation uses an electrical pulse to create a temporary electric field to act on cell membranes to create temporary pores through which larger molecules or hydrophilic molecules can pass into cells, thus promoting permeability.

RF&Suction Body

Massaging skin and muscles with a special vacuum suction handle can effectively improve the humoral fluidity of human cells, and increase the movement of cells to improve skin elasticity. Meanwhile, it can accelerate the blood circulation of microvessels, expel toxins from the body through the normal circulation of the lymphatic system, and reduce the probability of occurrence of adverse conditions such as spots, pigmentation and congestion in various parts of the body. The kneading sensation generated by vacuum suction can increase the tissue activity of skin and muscle, and therefore help to reduce tough tissue and increase the elasticity of skin tissue, so that both body slimming and shaping can be realized at the same time. In addition, the movement of vacuum cup can also stimulate sympathetic nervous system to lower skin sensitivity. The suction and release process of air pressure can not only improve capillary system but also promote the flow between deeper veins and lymphoid gland network to strengthen

blood vessels and alleviate the condition of varicose veins.

Advantages: it is superior to the previous vacuum working mode which is single and simple. Using different modes for different parts can be more efficient and more effective for slimming and shaping body, and it will never harm human body. Uniquely designed RF tips integrate RF and vacuum as a whole, in which RF and vacuum can exist independently and also are complementary to each other. Compared to the ordinary one-polar RF, it can ideally shape body in a more effective, faster and evener way.

Vacuum Physical Effects

1. Skin layer

The suction and release of air pressure:

(1) It can improve the fluidity of cells, thus increasing the movement of cells, and can treat diseases related to blood stasis and blood stagnation.

(2) It can drain excess water of lymph glands and veins.

Effects: redundant water is discharged from tissue fibers.

2. Vascular layer

The suction and release of air pressure:

(1) Improve the blood circulation of microvessels for the capillary system, and also promote the flow between the deeper veins and lymphatic networks.

(2) Remove harmful substance in the body.

Effects: Strengthen blood vessels, eliminate toxins and relieve he condition of varicose veins.

3. Fibrous layer

The suction and release of air pressure:

It can deliver two kinds of effects in different tissues (including skin, muscle and so on).

(1) Repair cells and increase their activity.

(2) Restore and improve skin elasticity.

(3) Stimulate the production of bone collagen and improve skin plumpness.

(4) Improve the oxygen absorption of skin and increase the consumption of carbon dioxide.

Effects: Break the hard fibers of cellulite, and make it more elastic so as to achieve the effect of body-shaping.

4. Nerve layer

The suction and release of air pressure:

It stimulates the surface and deep layer of sympathetic nervous system.

(1) Lower the sensitivity of skin.

(2) Restore skin elasticity and help resist tissue fibrosis.

Effects: Repair cells and lower skin sensitivity.

RF&Ultrasound

Ultrasonic wave is used to make human adipose cells take a strong impact and produce friction movement after strong sound waves enter into the human body, which can effectively consume heat and water of cells and shrink adipose cells. In addition, when the sound wave vibrates, it can produce a strong impact on cells. And then the adipose cells will burst instantly, and they will be reduced so as to achieve the effect of fat removal.

Ultrasonic Cavitation: Tens of thousands of tiny bubbles, namely cavitation bubbles, are produced by vibration of liquid. These bubbles grow in the negative pressure region formed by the longitudinal transmission of ultrasound, which will close rapidly in the positive pressure region to be compressed and stretched under alternating positive and negative pressures. When the bubbles burst, there will be huge instantaneous pressure of up to tens of MPa to hundreds of MPa, and strong vibration and noise will be produced.

Advantages: It only aims for low-density adipose tissue for its specific frequency, and protects high-density tissue such as vascular and nerve tissue.

RF waves directly penetrate the skin, making use of the resistance formed by the skin to produce heat to promote collagen growth by raising the temperature of the bottom layer of skin and heating tissue quickly and continuously. In this way, it can achieve the effects of firming, lifting and smoothing skin.

Lipo Laser

Laser fat-dissolving device uses red laser with a wavelength of 635nm-650nm, which has a visible spectrum. The laser with such wavelength has strong penetration, which can penetrate through fat layer and dissolve subcutaneous fat by heat. It is safe without side effects or pain.

Low-level laser energy chemical signals are sent to fat cells to break down triglycerides stored in the body's fat layer into free fatty acids and glycerol and release them through membrane channels. Fatty acids and glycerol are transported to tissues that produce metabolic energy. The release of fatty acids is a natural response when the body needs to use stored energy reserves, so there is no unnatural reaction in the body, nor does it affect or damage surrounding structures such as skin, blood vessels and peripheral nerves. After a period of exercise therapy, it can be seen that the free fatty acids of the body are eliminated through complete metabolism.

Biological Effect

Low-energy laser(biological stimulation) is used here to work on deep fat. It stimulates biological cells and induces or strengthens a series of physiological reactions by releasing energy, including promoting local blood circulation, regulating cell function, enhancing immune function and promoting cell metabolism. It can tighten skin, reduce wrinkles, remove fat, and shape body concurrently. Laser has so strong penetration that it can penetrate through fat layer to heat up and dissolve subcutaneous fat. The treatment is safe and painless without side effects.

Using the latest non-operative and non-invasive laser fat decomposition technique, it can release low-level laser energy. It produces a kind of chemical signals in the fat cells, which will dissolve the triglycerides stored in body into free fatty acid, glycerin and water molecules. And this is the natural reaction when human body needs to use the energy reserves. The free fatty

acids are transported into the whole body through the lymphatic system to provide energy, just like body will react when there is a lack of energy.

Face Firming&Anti-ageing 1. Handpiece

RF&Suction, EMS&EL

2. Effects

- 1. Firm face and enable the deep introduction of nutrients.
- 2. Increase skin elasticity and smoothness
- 3. Moisturize the skin and increase the absorption rate of the skin.
- 4. Accelerate blood circulation and metabolism.
- 5. Relieve the symptoms of double chin and tighten skin.
- 6. Stimulate collagen proliferation and delay aging

3. Applicable Range

- 1. Those whose faces are dark and dull.
- 2. Those whose skin is flabby and sagging.
- 3. Those who have fine lines, nasolabial folds , wrinkles at eye corners.
- 4. Those whose face contours are not clear.
- 5. Those who have rough skin and large pores.
- 6. Those who work for a long time in the office and are exposed to ultraviolet rays.
- 7. Those who have sagging skin, edema or puffiness after giving birth

4. Inapplicable Range

1. Those who have just undergone plastic surgery with prostheses and metal materials, etc., implanted at the operation area.

2. Those who have experience in injection products recently, such as hyaluronic acid, or those who have mesotherapy, wrinkle removal, or plastic surgery.

3. Those who have hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc.

- 4. Those who are in allergic period and have severely sensitive skin and metal allergies.
- 5. Those who have trauma or wound on the skin.
- 6. Those who are of advanced years.
- 7. Those who are in menstruation, pregnancy, lactation, surgical recovery.
- 8. Those who have skin diseases and infectious diseases.
- 9. Those who are sensitive to electric currents.

5. Do's and Don'ts after operation

1. Wash face with hot water within 3 days

2. Keep hydrated and prevent skin damages caused by sun ray

3. Do not use irritating products within one week such as AHA, scrubbing and exfoliating products

4. Do not stay up late, smoke cigarettes and drink alcohol. Eat more fruits, vegetables and light foods.

5. Apply face mask at least 3 times in the following week.

Firming for V-shaped Face

1. Handpiece

RF&Suction, EMS&EL, Small Lipo Laser

2. Effects

1. Firm face and enable the deep introduction of nutrients.

2. Increase skin elasticity and smoothness.

3. Moisturize the skin and increase the absorption rate of the skin.

4. Accelerate blood circulation and metabolism.

5. Relieve the condition of double chin and help build V-shaped face.

6. Stimulate collagen proliferation and slow down ageing.

3. Applicable Range

1. Those whose faces are dark and dull.

- 2. Those whose skin is flabby and sagging.
- 3. Those who have fine lines, nasolabial folds , wrinkles at eye corners.
- 4. Those whose face contours are not clear.
- 5. Those who have rough skin and large pores.
- 6. Those who work for a long time in the office and are exposed to ultraviolet rays.

7. Those who have sagging skin, edema or puffiness after giving birth.

8. Those who have double chin and have unwanted fat on neck.

4. Inapplicable Range

1. Those who have just undergone plastic surgery with prostheses and metal materials implanted at the operation area.

2. Those who have used injections recently, such as hyaluronic acid, skin booster or wrinkle removal product.

3. Those who have hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc.

4. Those who are in allergic period and have severely sensitive skin and metal allergies.

5. Those who have trauma or wound on the skin.

6. Those who are of advanced years.

7. Those who are in menstruation, pregnancy, and lactation or who are recovering from operations.

8. Those who have skin diseases and infectious diseases.

9. Those who are sensitive to electric currents.

5. Do's and Don'ts after operation

1. Wash face with hot water within 3 days.

2. Keep hydrated and prevent skin damages caused by sun ray.

3. Do not use irritating products within one week such as AHA, scrubbing and exfoliating products.

4. Do not stay up late, smoke cigarettes and drink alcohol. Eat more fruits, vegetables and light foods.

5. Apply face mask at least 3 times in the following week.

Neck Care

1. Handpiece RF&Suction

2. Effects

1. Relieve flabbiness, roughness and dullness of the neck skin.

- 2. Firm skin and increase skin elasticity.
- 3. Relieve the condition of double chin.
- 4. Accelerate lymphatic detoxification and improve facial texture.
- 5. Prevent neck and lymph diseases.

3. Applicable Range

- 1. Those with rough and dull skin on the neck.
- 2. Those with lymphatic blocking
- 3. Those with sagging and inelastic neck skin.
- 4. Those who often bow their heads
- 5. Those who are not satisfied with their skin colour.

4. Inapplicable Range

1. Those who have just undergone plastic surgery.

2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism and malignant tumors.

- 3. Those who are having an allergic reaction, or people with severe sensitive skin.
- 4. Those with skin trauma or wound.
- 5. Those who are of advanced years.
- 6. Those who are pregnant or convalescents.
- 7. Those with skin disease and other contagious diseases.

5. Do's and Don'ts after Operation

- 1. Keep neck warm and do not expose yourself to strong sunlight
- 2. Do not use the products containing alcohol and AHA or scrubbing cream within 1-3 days.

3. Do not wash face with too hot water or go for sauna, hot spring and violent exercise within 7 days.

4. Keep hydrated and apply neck mask at least 3 times a week, for the treated area is relatively dry. Apply essence or neck cream.

5. Do not bow your head for a long time.

Body Management

(1). Waist&abdomen Shaping

1. Handpiece

RF&Suction Body, RF&Ultrasound , Lipo Laser

2. Effects

- 1. Relieve cold hands and cold feet, cold womb or cold body of women.
- 2. Tighten the skin on the waist and abdomen.
- 3. Reduce lumbar and abdominal fat.
- 4. Tighten skin, relieve stretch marks, obesity lines and increase skin elasticity.
- 5. Accelerate metabolism, relieve constipation and improve intestinal peristalsis.

3. Applicable Range

- 1. Those with cold feet, cold hands, cold womb and cold body.
- 2. Those with lumbar and abdominal fat or who have sagging skin after birth.
- 3. Those who often sit for a long time, or have unsatisfactory waistlines.
- 4. Those with stretch marks.
- 5. Those with constipation or obstruction of abdominal meridians.

4. Inapplicable Range

- 1. Those with "3 Hs" (hypertension, hyperglycemia, hyperlipidemia) and who have heart disease.
- 2. Those in pregnancy, menstruation or lactation.
- 3. Those whose incisions are healing or who are on the road to recovery.
- 4. Those with epilepsy and severe diabetes and hyperthyroidism.
- 5. Those with malignant tumors, hemophilia or severe bleeding.
- 6. Those with skin diseases and infectious diseases.
- 7. Those with severe gynecological diseases.
- 8. Those whose gynecological diseases are being treated.

5. Do's and don'ts after Operation

1. Avoid crop top or anything exposing waist and abdomen as well as cold and windy environment.

2. Avoid binge eating or drinking. No alcohol, no spicy and greasy food. Staying up late should be avoided. Drink warm water.

3. Keep abdomen warm. Take a bath after 4-6 hours.

4. Steam sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.

5. Before going to bed at night, you can rub your abdomen clockwise with your hands, so as to help with metabolism and weight loss.

(2). Arm Shaping

1. Handpiece

RF&Suction Body, RF&Ultrasound, Lipo Laser

2. Effects

1. Stimulate collagen growth in the bottom of the skin to shape and firm it.

2. Improve sagging skin.

3. Improve flabby arms and thick arms.

- 4. Soothe and firm sagging skin.
- 5. Tighten skin.
- 6. Accelerate blood circulation and dredge meridians and collaterals.

3. Applicable Range

- 1. Those with thick arms and want to look better in clothes.
- 2. Those with flabby arms.
- 3. Those with sagging arm skin.
- 4. Those whose arms are prone to pain and numbness.
- 5. Those who often hold baby or children

4. Inapplicable Range

1. Those who have just had plastic surgery.

2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc.

- 3. Those who are during allergic period and has severely sensitive skin.
- 4. Those with skin trauma or cut.
- 5. Those who are of advanced years.
- 6. Those who are pregnant and who are recovering from surgery.
- 7. Those with skin diseases and infectious diseases.

5. Do's and Don'ts after Operation

- 1. Keep warm after operation. Do not eat cold food.
- 2. Take shower in 4-6 hours.
- 3. Drink plenty of warm water to stay hydrated.
- 4. Do not eat and drink too much or stay up late.
- 5. Avoid sauna, hot spring or strenuous exercise within one week after operation.

(3). Back Shaping

1. Handpiece

RF&Suction Body, Lipo Laser

2. Effects

- 1. Relieve shoulder and back soreness, and improve the lump on back of the neck.
- 2. Dredge channels and collaterals, and improve channels and collaterals blocking.
- 3. Increase blood circulation and metabolism.
- 4. Improve blood supply to the head and sleep.
- 5. Regulate the functions of viscera and strengthen the body.
- 6. Firm skin and prevent skin from sagging.
- 7. Reduce excess fat on the back and shape back.

3. Applicable Range

- 1. Those with sore shoulders and backs and stiff necks.
- 2. Those who suffer from insomnia, dream a lot or have a worse memory.
- 3. Those who are prone to fatigue, drowsiness and poor circulation of qi and blood.
- 4. Those with thick back and want to look better in clothes.
- 5. Those who have a lump on the back of the neck.

4. Inapplicable Range

- 1. Those with metal implants in the body, such as stents and pacemakers, are allergic to metal.
- 2. Those are during pregnancy, menstruation and lactation.
- 1. Those whose surgical wound is healing or convalescence
- 2. Those who has "three Hs", heart disease, epilepsy and severe diabetes and hyperthyroidism.
- 3. Those with malignant tumor and hemophilia or severe bleeding.
- 4. Those with skin diseases and infectious diseases.
- 5. Those who are too weak.
- 6. Those who are drunk, thirsty, overworked, on a full or empty stomach.

5. Do's and Don'ts after Operation

- 1. Keep warm, avoid cold air and drink plenty of hot water.
- 2. Take shower in 4-6 hours after operation.
- 3. Avoid staying up late, drinking and overeating.
- 4. Avoid raw, cold and spicy foods and get enough sleep.
- 5. Avoid shoulder-baring and backless clothes

(4). Leg Shaping

1. Handpiece RF&Suction Body, RF&Ultrasound, Lipo Laser

2. Effects

1. Tighten skin and prevent sagging.

2. Stimulate collagen regeneration and improve fat lines.

3. Increase leg circulation and detoxification, metabolism.

4. Promote blood circulation and remove blood stasis, dredge channels and collaterals, and prevent varicose veins.

5. Tighten excessive protruding fat on legs and get rid of fat on thick thighs.

3. Applicable Range

1. Those with poor circulation of lower limbs, edema and obese people.

2. Those who have low immunity and feel discomfort and pain all over the body are prone to colds.

3. Those with constipation and has coarse, flabby skin.

4. Those whose channels and collaterals of the legs are blocked, and the proportion of the legs is poor.

4. Inapplicable Range

1. Those who are in menstruation, pregnancy or lactation.

2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc

3. Those with skin diseases or infectious diseases.

- 4. Those who have incisions on their bodies.
- 5. Patients with severe varicose veins and tumors.
- 6. Those who are having allergic reactions or who have severely sensitive skin.
- 7. People who have just had liposuction.
- 8. Those who are of advanced years.

9. Pregnant women or who are on the road to recovery.

5. Do's and Don'ts after Operation

1. Keep warm after operation. Do not eat cold food.

2. Take shower in 4-6 hours later.

3. Drink more warm water to keep hydrated and speed up metabolism.

4. Do not eat and drink too much or stay up late.

5. Avoid sauna, hot spring or strenuous exercise for 7 days after operation.

6. Wear pants after operation. Avoid wearing miniskirts and shorts.

(5). Butt Shaping

1. Handpiece

RF&Suction Body, Lipo Laser

2. Effects

1. Improve blood circulation and speed up metabolism.

2. Improve menstrual pain, irregular menstruation, abnormal leucorrhea and other female diseases.

3. Improve sleep quality, improve female sexual function and tighten the vagina.

4. Maintain the normal function of ovary, stimulate the secretion of glands, and make couple's relationship closer.

5. Make complexion ruddy, fade color spots and return to young state.

6. Shape hips, improve sagging and outward expansion of hips, tighten skin and increase elasticity.

3. Applicable Range

1. Those with saggy hips and fat accumulation.

- 2. Those with stretch marks induced by obesity and obesity.
- 3. Those whose butt shape is not good-looking, flat and soft outward expansion.

4. Those with cold and cool hips with low hip temperature.

5. Those with cold womb, dysmenorrhea, irregular menstruation, gynecological inflammation and other problems.

6. Those with decreased estrogen levels and poor sex lives.

4. Inapplicable Range

1. Those who are in menstruation, pregnancy, lactation and operation recovery.

2. Those with hypertension, heart disease, diabetes, severe thyroid gland, malignant tumor, etc

3. Those with skin diseases, patients with infectious diseases and skin sensitive period.

- 4. Those with wounds during recovery from surgery.
- 5. Those with allergic and severely sensitive skin.
- 6. Those who have just had liposuction.
- 7. Those who are of advanced years.

5. Do's and Don'ts after Operation

1. Keep hips warm and avoid wearing miniskirts and shorts.

- 2. Take a shower in 4-6 hours after operation.
- 3. Drink plenty of hot water to avoid getting a cold.
- 4. Avoid staying up late, drinking and overeating.

- 5. Avoid eating raw, cold and spicy foods and get enough sleep.
- 6. Sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.

Part II

1. Detailed Operation

Connect the accessories to the machine as the following picture shows.

After all are connected properly, the following interface will appear when the start button is pressed.

1. Interface Introduction

2. Detailed Operation of RF&Ultrasound Cavitation

to go to the following interface

buttons for lowering and raising energy level.

d mode selection of Ultrasound

лл

Constant working mode, suitable for those with thick fat accumulation

Discontinuous mode, suitable for those who have fat on specific areas and want to shape body.

PRO mode selection of RF

NOR

Fixed mode, the red light is on and the RF energy directly reaches preset level after the stat button is pressed.

PRO

Smart mode, the red light is on and the RF energy slowly reaches preset level after the stat button is pressed and the handpiece touches skin.

3. Detailed Operation of RF&Suction Body

Smart mode, the red light is on and the RF energy slowly reaches preset level after start button is pressed and the handpiece touches skin.

suction time and adjusting buttons(suction time is longer than

release time

button for increasing suction time

RELEASE

Release time and adjusting buttons(when it is zero, the handpiece is at Constant Suction status)

button for decreasing release time

button for increasing release time

knob for adjusting suction level(turning it clockwise is to increase suction and turning it anticlockwise is to decrease suction

4. Detailed Operation of RF&Suction

button for deceasing suction time

button for increasing suction time

Release time and adjusting buttons(when it is zero, the handpiece is at Constant Suction status)

button for decreasing release time

button for increasing release time

knob for adjusting suction level(turning it clockwise is to increase suction and turning it anticlockwise is to decrease suction

5. Detailed Operation of EMS&EL

6. Detailed Operation of Lipo Laser

choose

to go to the following interface

If the leftmost bar is chosen("1" area), the energy of all the large/small lipo laser pads can be adjusted simultaneously.

If you want to adjust the energy of a certain pad, you need to choose one of the bars in "2" area, and the energy of corresponding lipo laser pad can be adjusted when you press the buttons for adjusting energy level.

mode selection

M1 is constant working mode(the laser is constantly on, suitable for those who want to reduce fat efficiently.)

M2 is discontinuous working mode(the laser flashes with low frequency, suitable for those who what to consolidate treatment results)

M3 is discontinuous working mode with high frequency(the laser flashes with high frequency, suitable for the beginning of treatment or the first-time users)

2. Technical Specifications

Technical Specifications

Ultrasound Cavitation 2.5 & RF Body Shape Handle Ultrasound Cavitation Frequency:30KHz Power:50W RF Frequency:5MHz Power:85W Suction& RF Body Sculpture Handle RF Frequency:5MHz Power:85W Suction Vacuum: <-80kPa Pressure: >250kPa Air flow: >10L/minute Noise level: <70dB (30cm away) Power:20W

Suction&RF Facial Slimming Handle Frequency:5MHz Power:85W Suction Vacuum: <-80kPa Pressure: >250kPa Air flow: >10L/minute Noise level: <70dB (30cm away) Power:20W

EMS&EL (Electroporation) Facial Anti-aging Handle EMS Frequency: 4.5KHz Power:10W EL (Electroporation) Frequency: 65Hz Power:10W

Net Weight: 7.60kg Gross Weight : 25.08kg Dimensions: 490x390x300 (mm) Input Power: AC 110V/220V 50/60Hz Power Consumption:MAX 150W Display: Touch Screen

3. Dos and Don'ts

1. The plug with grounding pin must be used before the instrument is used and the power socket of the instrument is properly grounded.

2. Ensure that the voltage of the instrument is suitable. If the voltage of the local power supply is not stable, we suggest that the user add a voltage regulator with matching power between the mains and the instrument.

3. In order to ensure the treatment effect and normal service life of the instrument, please use the specified parts provided or suggested by the original manufacturer.

4. The instrument should not be placed in damp places or near water sources, and should not be directly exposed to sunlight.

5. Do not place the instrument near a strong heat source, as this may affect the life and normal use of the instrument.

6. Before treatment, please remove all metal objects from the body first, so as to avoid unexpected conditions and influence the curative effect.

7. Please restrain from using the device on eyes, thyroid, parathyroid, testicles, abdomen of pregnant women, and pacemakers.

8. Patients who are suffering from illness should consult with a doctor and gain permission from the doctor before using.

9. Please turn off the power switch of the device, and ensure that the total power supply of the device is turned off before the staff leaves after daily use so as to ensure the safety of using the electrical products.

10. Set the energy at lowest level at the beginning and slowly raise it after the customer adapts to it.

11. Clean the instrument with normal saline after operation to ensure its cleanliness to prolong its service life.

12. The handle can be used alone. Better results will be delivered if one handle works in conjunction with other handles.

13. Make sure the handle is in full contact with skin during operation in case skin is heated unevenly.

14. The treatment area should be kept moisturized during the operation and do not perform the treatment on dry skin.

15. When the treatment receiver is taking other weight-loss drugs, it is recommended to stop taking them for 1 to 2 months before treatment. Extension of the course of treatment is recommended if the treatment receiver want to use this machine immediately.

16. RF&Ultrasound handpiece should not be used on head, chest, breast, heart and back.

17. Use this machine or train the operators in strict accordance with instructions in the user manual.

4. Troubleshooting & Solutions

1. The instrument cannot be started, and the button light on the back of the instrument does not work?

A. Make sure the power cord is connected to the socket with normal power supply.

B. Whether the fuse on the back of the instrument is loose or blown.

2. No RF output from the instrument?

A. Please check whether the cord connects the handle to the machine properly

B. Please check whether the treatment area has been cleaned. Grease or essential oil products may cause poor contact between the handle and human body to cause this problem.

3. Weakened RF output?

A. Please check whether the cord connects the handle to the machine properly

B. Please check whether non-conductive grease and other substances are on the treatment handle, which can cause poor contact between the handle and skin to weaken the output.

C. Please check whether the handle used is the one specified by the instrument.

4. There is weak or no suction?

A. Please turn off the machine and check whether the dedicated filter should be replaced.

B. Please check the hose connecting cup to machine body, which may be broken.

C. Please check whether the container of the filter is screwed tight and rubber rings are worn down. This case can occur if the area is not airtight.

D. If methods above can not solve such problem, please contact machine distributor for help.

5. I can start the instrument, but the screen shows erroneous message?

A. Please unplug the power plug behind the instrument and wait for about 1 minute before restarting the instrument.

B. If the above method cannot solve the problem, please contact the instrument dealer for assistance.

5. FAQs

1. Q: How long does it take before I start seeing results of RF treatment?

A: Normally, you can see the treatment results that day when you take the operation or within one week. Skin collagen tissue is heated and then contracts, and you can obviously feel the sensation of skin being tightened. Because RF works to stimulate subcutaneous tissue to promote collagen regeneration, so the more you take the treatment, the more noticeable the effects will be.

2. Q: Is RF harmful to skin?

A: RF treatment is non-surgical operation. It stimulates collagen regeneration at the skin bottom and boosts metabolism, and therefore has no damage to the skin. Local redness and hotness are the normal conditions of accelerated blood circulation, which will be relieved after a moment. So there's no need to worry about that.

3. Q: How long does the body-firming treatment take?

A: One treatment session is 60 minutes. We will combine professional techniques and instruments to achieve remarkable results.

4. Q: What functions does this instrument have?

A: It has the functions of dissolving fat and shaping body, firming &lifting skin and anti-aging. It can be operated on every part of the body. In terms of facial care, it can form face contour, alleviate wrinkles and saggy skin. In terms of body care, it can reduce regional fatness and build S-shaped curve, and promote metabolism and detoxification of the whole body. Meanwhile, it can also enhance the functions of viscera and solve sub-health problems.

5. Q: Which one is better in terms of weight loss, liposuction or this machine?

A: The principle of liposuction is to suck out the excess fat in one part of the body through negative pressure suction so as to achieve the purpose of rapid weight loss. It's a surgical treatment requiring anesthesia and so there is recovery period, which has risks despite its immediate results. However, our instrument is risk-free without side effects. It can not only help you reduce fat but also stimulate collagen regeneration to lift and tighten skin. It can also build perfect curves by lifting skin, and accentuate women's sexual charm.

6. Q: Will I regain weight after operation?

A: RF works to dissolve fat to reduce weight, and users are not prone to regain their weight. Because what's dissolved through ultrasonic treatment is fat, not water. Fat needs a longer period of time to accumulate, so normally people will not regain weight.

7. Q: Do I need to be on a diet?

A: Pay attention to what you eat. Because radio frequency and ultrasonic treatment work to dissolve fat and accelerate metabolism. It's best to avoid eating spicy, oily, or fried food in case they affect regular metabolism. Proper workout for sweating helps with fat metabolism process. In such way, the results will be more noticeable.

8. Q: Does it have side effects on the body?

A: RF beauty treatment is non-invasive and is one of the most effective and the safest approach to remove wrinkles and shape body. Generally speaking, side effects won't appear. A small number of people may experience transient redness or swelling that will disappear after a few hours. Those with dry skin may experience atrophy after treatment, which will disappear after three days because collagen regeneration will make skin plump up though RF heat can cause moisture loss of skin. Overall, there are no side effects on people's health.

9. Q: Can ultrasound treatment be performed on every part of the body?

A: Ultrasound treatment works to rupture fat cells, by which fat is released from cells and then metabolized through lymphatic system. So its power is very high. Heart is sensitive to high frequency sound waves since it is a hollow organ. After being vibrated by sound waves, the heart will reflect the waves due to the different transmission of sound waves by the muscle tissue and the blood in the heart. This force can pulls valves away from the heart muscle. If you use the instrument on eyes, it can lead to retinal detachment, so the ultrasound treatment

should not performed on the areas of eyes and heart. (not on the areas of waist, back and chest)

10. Q: Does ultrasound treatment have side effects on human body?

A: Ultrasonic beauty treatment is non-surgical and non-invasive program without anaesthesia. It relies on ultrasound (mechanical sound wave) - dissolve fat through cavitation - ultrasound focusing. And the results are fat smash - fat dissolving - skin firming and body sculpting respectively. It only targets low-density fat cells but leaves high-density tissue like blood vessels intact, and therefore has no side effects on human body. Slight tinnitus will probably occur during the treatment, which is within normal range. So there's no need to worry about that.

11. Q: Why does tinnitus occur?

A: It's because ultrasound comes with a high frequency vibration, which could go up to 20kHz. It penetrates into 20mm-deep skin fat layers through ultrasound focusing. Highly intensified ultrasound can cause high-speed friction among fat cells, which can heat and dissolve them. And during the process, sound may be produced so that customer will have the sensation of tinnitus.

12. Q: What is collagen?

A: Collagen is a kind of biological macro molecule substance, a kind of white, opaque and nonbranched fibrous protein. It can supplement the nutrients needed by all layers of the skin, enhance the collagen activity in the skin, retain moisture, nourish skin, slow down ageing, relieve facial relaxation, provide nutrients for the hair and so on. Collagen is a nutrient that human body must replenish to delay ageing. With the growth of age, collagen will gradually be lost. For women, collagen will begin to decrease since the age of 20. At the age of 25, collagen loss will reach its peak. At the age of 40, the collagen content is less than half of that one has at age of 18. It is the loss of collagen and water that causes the wrinkles on the face of the elderly. The breakage of collagen fibers and elastic fibers will cause skin tissue to be oxidized, atrophied and collapsed. The skin will be dry, wrinkled, flabby and inelastic. Therefore, in order to delay ageing, there must be plenty of collagen.

13. Q: How does vacuum detoxify?

A: Vacuum can cause capillary congestion, stimulate cell to increase vitality. The suction and release of pressure during operation can make local pores continue to open and close, which can promote skin breathing, increase the amount of skin oxygen, and speed up waste removal. So it achieves the effects of promoting qi and blood circulation, dispelling cold and damp, dredging meridians and collaterals, clearing toxins, dissipating heat and so on.

6. Packing List

- 1 x S-SHAPE Main Machine
- 1 x Suction& RF Facial Slimming Handle
- 1 x EMS& EL (Electroporation) Facial Anti-aging Handle
- 1 x Ultrasound Cavitation&RF Body Shape Handle
- 1 x Suction&RF Body Sculpture Handle
- 1 x Power Supply Cord (Both 110v and 220v voltage (frequency: 50/60Hz) version are available.
- Also we stock the USA, UK, AU, EU plug to suit for the country all over the world.)
- 6 x laser paddles
- 2 x Small paddles
- 1 x Holder

7. Simplified Treatment Steps

1. Skin -firming & anti-ageing

Remove makeup--clean face--apply toner--massage techniques--EMS&EL--RF&Suction--apply face mask--apply water,essence/eye serum/neck essence, face cream/eye cream/neck cream, suncream.

Needed skincare products: serum, RF cream/massage cream

1. Firming for V-shaped face

Remove makeup--clean face--apply toner--massage techniques--EMS&EL--RF&Suction--Small Lipo Laser--apply face mask--apply water, serum, lotion/face cream, suncream. Needed skincare products: serum, RF cream/massage cream

2. Neck care

Remove makeup--clean neck--apply toner--massage techniques--RF&Suction--apply neck mask-apply water, essence/neck essence, neck cream, suncream Needed skincare products: RF cream/massage cream

3. Abdomen&waist shaping/arm shaping/leg shaping

Massage techniques--RF&Ultrasound--RF&Suction Body--wipe the treated area clean--Lipo Laser Needed skincare products: gel, RF cream/essential oil

4. Back shaping/butt shaping

Massage techniques--RF&Suction Body--wipe the treated area clean--Lipo Laser Needed skincare products: RF cream/essential oil

cream and suncream	
34. The end	

A course of treatment consists of ten treatment sessions. After one session, skin will be firmed and hydrated with necessary nutrients absorbed. After a full course, skin will be lifted with glow. The condition of double chin will be relieved. Two courses help increase skin smoothness and plumpness and make face contour clearer. Three courses help promote skin metabolism and detoxification, fade pigmented spots and brighten dull skin, prevent skin from sagging and ageing and make the collagen at skin bottom regenerate to leave skin rejuvenated, smoothed and firmed. In this way, you will have attractive V-shaped face.

A course of treatment consists of ten treatment sessions. After one treatment session, metabolism will be accelerated. After one course, fat will be slowly metabolized, body will start to slim down. Constipation and other issues will be relieved at the same time. After two courses, the effects will gradually become obvious, skin will be tightened and lifted, and skin collagen will be increased. Stretch marks and flabby skin are also alleviated. Three courses will help consolidate the effects. Unwanted fat will gradually disappear, and waist and abdomen curves will start to take shape.

--

A course of treatment consists of 10 treatment sessions. After one treatment session, back will be significantly relaxed, neck stiffness will also be alleviated, and skin will be lifted. A course will help relax shoulder, reduce back fat, relieve the lump on the nape of the back, and shape the back line. After two courses, the lump will appear to be smaller, meridians will be dredged, sub-health problems will be solved, and sleep quality will be improved. 3 courses will help with back thinning, back line refinement, strengthening visceral function, improving digestion, detoxification and metabolism(one course of treatment is to reduce fat, two courses are to strengthen effects, and three courses help consolidate effect and prevent the reappearance of above condition.)

Leg Shaping: 90 min once a week

	thigh in annular motion, 3
	times.
	39. Lift from knee to the top of
	thigh line by line, 3 times.
	40. Wipe the area clean.
	41. Lipo Laser operation: use
	strap to fix the lipo laser pads
	on the fat area of leg, 15-20
	minutes.
	42. Remove the pads
	43. The end.
Treatment Suggestions	· ·

A course of treatment consists of ten treatment sessions. After one treatment, leg will be relaxed, and circulation will be accelerated. After one course of treatment, leg will become thin, there will be contraction of skin collagen due to heat effect, and tightening effect can

obviously be felt on the skin. After 2 courses of treatment, there will be obvious results with the slimness and firmness of legs promoted. 3 courses will help consolidate the effects. This treatment can stimulate dermis to promote constant collagen regeneration. So the treatment results will be more obvious.

	forth, 3 times.
	10. Repeat technique 7
	11. Soothe the treatment area.
	12. Repeat the techniques
	above on the other side.
	13. The end.
	14. RF&Suction Body operation:
	lift from the top of thigh to
	Meridian BV line by line, 3
	times.
	15. Lift upwards from both
	sides of the buttocks to the
	highest point of the buttocks 3
	times.
	16. Move the handpiece in
	small spiral curve on hip, 3-5
	times
	17. Lift from the top of thigh to
	Meridian BV line by line, 3
	times.
	18. Lift upwards from both
	sides of the buttocks to the
	highest point of the buttocks 3
	times.
	19. Do the same on the other
	side.
	20. Wipe the area clean.
	21. Lipo Laser operation: use
	strap to fix the lipo laser pads
	on the fat area of butt, 15-20
	minutes.
	22. Remove the pads
	23. The end.

One course of treatment consists of 10 treatment sessions. After one treatment, buttocks will experience the sensations of being heated and lifted. After one course of treatment, buttocks start to show obvious curve lines, excessive fat begin to disappear slowly, and skin appear to be tight. After 3 courses, the conditions of cold body and uterus, other gynecological problems such as irregular menstruation are relieved, which can help consolidate the effect to mare females more attractive.
