

User Manual

WL-7003C

Preface

Dear Users,

We're pleased to present to you our latest beauty machine, which adopts vacuum&cooling, multi-polar RF and 40K technologies for reducing fat and shaping body. It is a professional beauty machine, which needs to be handled by professionals with proper training. Any improper use will result in adverse outcomes. Therefore, we advise any personnel to read this manual thoroughly and follow the instructions strictly before operation.

We believe our quality product will bring in good returns on your end. Also, you can count on our worry-free after-sales service.

Thank you!

Part I

Brief Introduction

Vacuum&cooling handle, multi-polar RF handle and 40K handle are among the most popular tools for firming skin, reducing fat, shaping body and anti-ageing. So, this machine can replace all fat-reducing and body-shaping programs in beauty salons. Moreover, it is convenient and easy to operate. It solves both skin and body management problems for beauty-seekers. This equipment requires no injection, no medication, and no operation, for which it has no side effects. It is used externally during the whole process and has an immediate effect. RF heats deeper skin layers, stimulates collagen to regenerate and reorganize in dermis, and promotes blood circulation at skin bottom, which can achieve the results of skin firming and anti-aging. Ultrasonic waves with specific frequencies target those parts in which there are stubborn fat to bring customers amazing results. Vacuum&cooling treatment is non-invasive fat-reducing approach, targeting the adipose cells on specific areas of body to reduce fat thickness for a noticeable figure curve.

Advantages

1. 4-in-1 beauty machine for facial and body care.
2. The ultrasonic wave can powerfully burn and remove fat, which surpasses liposuction to solve the problems for obese people.
3. The perfect combination of ultrasound and radio frequency solves major problems in losing weight. It helps with weight loss and meanwhile firms skin, increases skin elasticity, promotes metabolism, and ultimately strengthen people's constitutions.
4. It adopts the advanced technology of ultrasonic wave fat-burning.
5. It adopts advanced and reliable technology of vacuum&cooling to make fat congeal.
6. The temperature of the vacuum&cooling handle ranges from -5°C to 5°C. And there is up to 5Kpa vacuum, which can stably exist for up to 60 min.
7. More advanced. No side effects. Better effects. No incisions and no reappearance of previous conditions
8. Wider treatment range for body and face.
9. It can reduce stubborn cellulite to build ideal body curve.
10. Various handles have the energy release of red LED light, which can dissolve fat and massage body, and accelerate metabolism and sterilize skin at the same time. It gives users remarkable effects and higher level of comfort.
11. It is suitable for saggy skin and all types of skin texture.
12. The cooling energy only targets the fat layer, causing no damages to viscera, nerves, blood vessels and skin.
13. It is easy to learn how to operate this machine. There is no need for preparation and recovery period. It is safe and can be widely used.

Face Firming and Anti-ageing

Working Principles

Face RF

RF wave can directly penetrate the skin and use the resistance formed by the skin to produce heat, which can raise the temperature of skin bottom. In this way, it has two therapeutic effects,

which are to make collagen regenerate and firm&lift skin.

After treatment, there will be an obvious sensation of being tightened immediately at the treatment area, the effect of skin firming and lifting can be seen about a month later, and the effect will become more and more obvious. The effect of RF treatment can last for about 18 months to 3 years, depending on the treatment areas and individual maintenance ways. The latest research shows that better results can be achieved if more treatments are taken.

Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to 45 °C ~ 60 °C, it will contract immediately and then the collagen will be stimulated to regenerate. At the same time, biological heat can effectively accelerate the blood flow and make free fatty acid (ffa) released to promote the dissolution of superficial fat to achieve the purpose of tightening and lifting saggy part of the body.

Effects

1. Firm face and enable the deep introduction of nutrients.
2. Increase skin elasticity and smoothness
3. Moisturize the skin and increase the absorption rate of the skin.
4. Accelerate blood circulation and metabolism.
5. Relieve the symptoms of double chin and tighten skin.
6. Stimulate collagen proliferation and slow down ageing.

Applicable Range

1. Those whose faces are dark and dull.
2. Those whose skin is flabby and sagging.
3. Those who have fine lines, nasolabial folds , wrinkles at eye corners.
4. Those whose face contours are not clear.
5. Those who have rough skin and large pores.
6. Those who work for a long time in the office and are exposed to ultraviolet rays.
7. Those who have sagging skin, edema or puffiness after giving birth.

Inapplicable Range

1. Those who have just undergone plastic surgery with prostheses and metal materials implanted at the operation area.
2. Those who have used injections recently, such as hyaluronic acid, skin booster or wrinkle

removal product.

3. Those who have hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc.
4. Those who are in allergic period and have severely sensitive skin and metal allergies.
5. Those who have trauma or wound on the skin.
6. Those who are of advanced years.
7. Those who are in menstruation, pregnancy, and lactation or who are recovering from operations.
8. Those who have skin diseases and infectious diseases.
9. Those who have unrealistic expectations about the effect.

Do's and Don'ts after operation

1. Wash face with hot water within 3 days
2. Keep hydrated and prevent skin damages caused by sun ray
3. Do not use irritating products within one week such as AHA, scrubbing and exfoliating products
4. Do not stay up late, smoke cigarettes and drink alcohol. Eat more fruits, vegetables and light foods.
5. Apply face mask at least 3 times in the following week.

Eye Anti-wrinkle

Working Principles

RF wave can directly penetrate the skin and use the resistance formed by the skin to produce heat, which can raise the temperature of skin bottom. In this way, it has two therapeutic effects, which are to make collagen regenerate and firm&lift skin.

Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce safe heat energy rapidly. When collagen tissue is heated to $45^{\circ}\text{C} \sim 60^{\circ}\text{C}$, it will contract immediately and then the collagen will be stimulated to regenerate. In the treatment of eyes, it works to make the bottom layer of eye skin quickly heat up and promote the growth of collagen, so as to achieve the effect of firming the skin around the eyes, removing bags under the eyes, removing dark circles under the eyes, and relieving bloodshot eyes and fine lines.

Effects

1. Relieve eye fatigue, dark circles, eye bags and edema.
2. Reduce lines around eyes and crow's feet.
3. Reduce dark spots and accelerate blood circulation.
4. Accelerate metabolism and prevent pigmentation.
5. Supplement eyes with nutrition and moisturize skin.
6. Firm and soften skin, lift the corners of the eyes.
7. Accelerate blood circulation around eyes and help skin absorb nutrients efficiently.

Applicable Range

1. Those with wrinkles, fine lines, bags and dark circles around the eyes.
2. Those with dry skin, dry lines and dynamic wrinkles.
3. Those with eyes prone to fatigue and dryness.
4. Those who frequently face computer screens and mobile phones.
5. Those who often stay up late and have dark circles.
6. Those who often stay in a dry or hot environment.

Inapplicable Range

1. Those who had just undergone plastic surgery.
2. Those who have hypertension, heart diseases, diabetes, severe thyroid diseases and malignant tumors.
3. Those who are having an allergic reaction and have severely sensitive skin or are allergic to metals.
4. Those who have skin traumas or wounds.
5. Those who are of advanced years.
6. Those who are pregnant or who are on the road to recovery from operations.
7. Those who have skin diseases and contagious diseases.

Do's and Don't s after Operation

1. Use suncream and do not expose yourself to strong sunlight.
2. Do not use the products containing alcohol and AHA or scrubbing cream in 1-3 days.
3. Do not wash face with too hot water or go for sauna, hot spring and violent exercise.
4. Keep hydrated and apply eye mask at least 3 times a week, for the treated area is relatively dry.

Neck Care

Working Principles

Face RF

RF wave can directly penetrate the skin and use the resistance formed by the skin to produce heat, which can raise the temperature of skin bottom. In this way, it has two therapeutic effects, which are to make collagen regenerate and firm&lift skin.

After treatment, there will be an obvious sensation of being tightened immediately at the treatment area, the effect of skin firming and lifting can be seen about a month later, and the effect will become more and more obvious. The effect of RF treatment can last for about 18 months to 3 years, depending on the treatment areas and individual maintenance ways. The

latest research shows that better results can be achieved if more treatments are taken.

Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to 45 °C ~ 60 °C, it will contract immediately and then the collagen will be stimulated to regenerate. At the same time, biological heat can effectively accelerate the blood flow and make free fatty acid (ffa) released to promote the dissolution of superficial fat to achieve the purpose of tightening and lifting saggy part of the body.

Effects

1. Relieve flabbiness, roughness and dullness of the neck skin.
2. Firm skin and increase skin elasticity.
3. Relieve the condition of double chin.
4. Accelerate lymphatic detoxification and improve facial texture.
5. Prevent neck and lymph diseases.

Applicable Range

1. Those with rough and dull skin on the neck.
2. Those with lymphatic blocking
3. Those with sagging and inelastic neck skin.
4. Those who often bow their heads
5. Those who are not satisfied with their skin colour.

Inapplicable Range

1. Those who have just undergone plastic surgery.
2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism and malignant tumors.
3. Those who are having an allergic reaction, or people with severe sensitive skin.
4. Those with skin trauma or wound.
5. Those who are of advanced years.
6. Those who are pregnant or convalescents.
7. Those with skin disease and other contagious diseases.

Do's and Don'ts after Operation

1. Keep neck warm and do not expose yourself to strong sunlight
2. Do not use the products containing alcohol and AHA or scrubbing cream within 1-3 days.

3. Do not wash face with too hot water or go for sauna, hot spring and violent exercise within 7 days.
4. Keep hydrated and apply neck mask at least 3 times a week, for the treated area is relatively dry. Apply essence or neck cream.
5. Do not bow your head for a long time.

Body Management

(1). Working Principles

1. Body RF

Based on the RF thermal effect, a specific radio frequency wave is produced at a specific depth of the skin, which acts directly on the dermis. In this way, it heats the tissue to promote the catabolism of subcutaneous fat, and stimulate the regeneration and reorganization of collagen and elastic fibers at the same time. With the continuous regeneration and reorganization of collagen in the dermis, the saggy skin will be lifted and firmed after several courses of treatment are taken.

Biological Effects

The waves vibrating millions of times per second can penetrate the epidermis and then directly act on the dermis to heat up collagen cells in a deep layer, and stimulate the growth of collagen fibers. In this way, it can make the skin firmer and more elastic. In the process of treatment, the RF waves can pass through the epidermis and act on the deep dermis to produce heat energy rapidly. When collagen tissue is heated to $45^{\circ}\text{C} \sim 60^{\circ}\text{C}$, it will contract immediately and then the collagen will be stimulated to regenerate. At the same time, biological heat can effectively accelerate the blood flow and make free fatty acid (ffa) released to promote the dissolution of superficial fat to achieve the purpose of tightening and lifting saggy part of the body.

02

3D RF radio Frequency

Using a high power of 3mhz 3D Smart RF radio frequency which is the same power for professional use, with a patent pending technology that generates heats deep under the skin, promoting metabolism by its hyper-thermal effect, this procedure enhances blood/lymph flow and is use for the purpose of fat reduction.

2. 40K

The principle of ultrasonic wave is used to make human adipose cells take a strong impact and produce friction movement among them after strong sound waves enter into the human body, which can effectively consume heat and water of cells and shrink adipose cells. In addition, when the sound wave vibrates, it can produce a strong impact on cells. And then the adipose cells will burst instantly, and they will be reduced so as to achieve the effect of fat removal.

Ultrasonic Cavitation: Tens of thousands of tiny bubbles, namely cavitation bubbles, are produced by vibration of liquid. These bubbles grow in the negative pressure region formed by the longitudinal transmission of ultrasound, which will close rapidly in the positive pressure region to be compressed and stretched under alternating positive and negative pressures. When

the bubbles burst, there will be huge instantaneous pressure of up to tens of MPa to hundreds of MPa, and strong vibration and noise will be produced.

Advantages: It only aims for low-density adipose tissue for its specific frequency, and protects high-density tissue such as vascular and nerve tissue.

3. Vacuum&Cooling

The vacuum&cooling handle uses vacuum to treat the fat area, which is a gradual process to target and remove fat. This treatment is non-invasive. Specifically speaking, it transmits cooling energy to fat area and after the adipose cells are cooled down to a certain temperature, triglyceride will become solid from liquid form and then the adipose cells will gradually die. They will be eventually excreted from body through metabolism. In this way, it can achieve the goal of reducing fat and shaping body.

Biological Effects

The adipose cells are extremely sensitive to low temperature while surrounding cells such as blood vessel cells, peripheral nerve cells, melanocytes, and fiber cells are much less sensitive to that, for which the adipose cells will go into inactivation under specific temperature range(0--10°)but the surrounding cells won't. During the treatment, the corresponding handle will be put on fat area, and the fat will quickly congeal into jelly-like substances. And then the phagocytosis(phagocytes engulf and digest microorganisms and cellular debris) will happen. The dead cells will be treated as waste by the body and will be excreted in 2-4 months. So, this treatment can not make you see immediate effects but you can feel the fat is gradually removed in two weeks to a month. It can help reduce fat and promote blood circulation and lymphatic circulation to remove waste in the body. Additionally, the dead adipose cell are also removed from the body and so it can effectively prevent the reappearance of fat accumulation.

Significant curative effect ❄️

You will be able to create a charming body in 30 minutes of time ,
after the first treatment ,the effect will probably appear in 4-6 weeks later ,
and gradually achieve the best result in the next 3 months.

(2). Waist&Abdomen Shaping

Effects

1. Tighten the skin on the waist and abdomen.
2. Reduce lumbar and abdominal fat.
3. Tighten skin, relieve stretch marks and increase skin elasticity.
4. Accelerate metabolism, relieve constipation and improve intestinal peristalsis.

Applicable Range

1. Those with lumbar and abdominal fat or who have sagging skin after birth.
2. Those sitting for a long time, or with bad waistlines.
3. Those with striae due to obesity and pregnancy.
4. Those with constipation or obstruction of abdominal meridians.

Inapplicable Range

1. Those with "3 Hs"(hypertension, hyperglycemia, hyperlipidemia) and who have heart disease.
2. Those in pregnancy, menstruation or lactation.
3. Those who have just undergone surgical wounds or convalescents.
4. Those with epilepsy and severe diabetes and hyperthyroidism.
5. Those with malignant tumors, hemophilia or severe bleeding.
6. Those with skin diseases and infectious diseases.
7. Those with severe gynecological diseases.
8. Those whose gynecological diseases are being treated.
9. Those who have liposuction, have prostheses or metal implants in their body, have injections such as hyaluronic acid, skin booster, wrinkle removal products or have taken plastic surgeries.

Do's and Don'ts after Operation

1. Keep abdomen warm. Avoid wearing crop top and getting a cold.
2. Avoid binge eating or drinking. No alcohol, no spicy and greasy food. Staying up late should be avoided. Drink warm water.
3. Take a bath after 4-6 hours.
4. Sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.
5. Do not scratch, press or knead the treatment area.

(3). Arm Shaping

Effects

1. Stimulate collagen growth at skin bottom
2. Relieve the condition of saggy skin.
3. Relieve the condition of flabby arms and thick arms.
4. Tighten skin.
5. Accelerate blood circulation and dredge meridians and collaterals.

Applicable Range

Those with thick arms and want to look better in clothes.

2. Those with flabby arms.
3. Those with saggy arm skin.
4. Those whose arms are prone to pain and numbness.
5. Those who often hold babies in their arms.

Inapplicable Range

1. Those who have just had plastic surgery like liposuction or who have prostheses or metal implants in their bodies.
2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc.
3. Those who are during allergic period and has severely sensitive skin.
4. Those with skin trauma or cut.
5. Those who are overly old.
6. Those who are pregnant and who are recovering from surgery.
7. Those with skin diseases and infectious diseases.

Do's and Don'ts after Operation

1. Keep warm. Avoid getting a cold.
2. Avoid binge eating or drinking. No alcohol, no spicy and greasy food. Staying up late should be avoided. Drink warm water.
3. Take a bath after 4-6 hours.
4. Sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.
5. Do not scratch, press or knead the treatment area.

(4). Back Shaping

Effects

1. Relieve shoulder and back soreness, and alleviate the lump on back of the neck.
2. Dredge meridians and collaterals.
3. Promote blood circulation and metabolism.
4. Improve blood supply to the head and sleep.
5. Regulate the functions of viscera and strengthen constitution.
6. Firm skin and prevent skin from sagging.
7. Reduce excess fat on the back and shape back.

Applicable Range

1. Those with sore shoulders and backs and stiff necks.
2. Those who suffer from insomnia, have a lot dreams in sleep and have worsening memory.
3. Those who are prone to fatigue, drowsiness and poor circulation of qi and blood.
4. Those with thick back and want to look better in clothes.
5. Those who have a lump on the back of the neck.

Inapplicable Range

1. Those with metal implants in the body, such as stents and pacemakers, are allergic to metal.
2. Those are during pregnancy, menstruation and lactation.
3. Those whose surgical wound is healing or convalescence
4. Those who has "three Hs", heart disease, epilepsy and severe diabetes and hyperthyroidism.
5. Those with malignant tumor and hemophilia or severe bleeding.
6. Those with skin diseases and infectious diseases.
7. Those who are too weak.
8. Those who are drunk, thirsty, overworked, and on a full or empty stomach.

Do's and Don'ts after Operation

1. Keep warm, avoid getting a cold and drink more hot water.
 2. Take shower in 4-6 hours after operation.
 3. Avoid staying up late, drinking and overeating.
 4. Avoid raw, cold and spicy foods and get enough sleep.
 5. Avoid strapless and backless clothes
- Sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.
6. Do not scratch, press or knead the treatment area.

(5). Hip Shaping

Effects

1. Promote blood circulation and accelerate metabolism
2. Improve sleep quality and females' sexual functions
3. Warm up ovary, stimulate the secretion of glands, and make couple's relationship closer.
4. Make complexion ruddy, fade color spots and return to young state.
5. Shape hips, relieve sagging and outward expansion of hips, tighten skin and increase elasticity.

Applicable Range

1. Those with saggy hips and fat accumulation.
2. Those with stretch marks induced by obesity and obesity.
3. Those whose butt shape is not good-looking, flat and soft outward expansion.
4. Those with decreased estrogen levels and poor sex lives.

Inapplicable Range

1. Those who are in menstruation, pregnancy, lactation and operation recovery.
2. Those with hypertension, heart disease, diabetes, severe thyroid gland, malignant tumor, etc
3. Those with skin diseases and infectious diseases.
4. Those with wounds during recovery from surgery.
5. Those who are having allergic reactions or have severely sensitive skin.
6. Those who have just had plastic surgeries like liposuction.
7. Those who are of advanced years.

Do's and Don'ts after Operation

1. Keep hips warm and avoid wearing miniskirts and shorts.
2. Take Shower in 4-6 hours after operation.
3. Drink plenty of hot water to avoid cold air.
4. Avoid staying up late, over-drinking and overeating.
5. Avoid eating raw, cold and spicy foods and get enough sleep.
6. Sauna, hot spring or strenuous exercise should be avoided within 7 days after operation.

7. Do not scratch, press or knead the treatment area.

(6). Leg Shaping

Effects

1. Tighten skin and prevent skin from sagging.
2. Stimulate collagen regeneration and smooth out stretch marks.
3. Promote leg circulation and detoxification, metabolism.
4. Promote blood circulation and remove blood stasis, dredge meridians and collaterals, and prevent varicose veins.
5. Get rid of fat on thick thighs.

Applicable Range

1. Those with poor circulation of lower limbs, edema and obese people.
2. Those who have low immunity and feel discomfort and pain all over the body are prone to colds.
3. Those with rough and flabby skin.
4. Those with blocked meridians and collaterals on legs and unsatisfactory leg proportion.

Inapplicable Range

1. Those who are in menstruation, pregnancy, or lactation.
2. Those with hypertension, heart disease, diabetes, severe hyperthyroidism, malignant tumor, etc
3. Those with skin diseases and infectious diseases.
4. Those with wounds during recovery from surgery.
5. Patients with severe varicose veins and tumors.
6. Those who are having allergic reactions and have severely sensitive skin.
7. People who have just had liposuction.
8. Those who are of advanced years.
9. Those who are pregnant or recovering from surgery.

Do's and Don'ts after Operation

1. Keep warm after operation. Do not eat cold food and get a cold.
2. Take shower in 4-6 hours
3. Drink more hot water to keep hydrated and speed up metabolism.
4. Do not overeat or stay up late.
5. Avoid sauna, hot spring or strenuous exercise for 7 days after operation.
6. Wear pants and avoid wearing miniskirts and shorts.
7. Do not scratch, press or knead the treatment area.

(7). Breast Shaping

Effects

1. Correct breast shape and relieve accessory breasts
2. Relieve nodules on breasts, slight hyperplasia and distending pain in breasts.
3. Relieve outward expansion of breasts.
4. Relieve irregular menstruation, speckles on the face and the lack of elasticity.
5. Relive breast atrophy, breast sagging and obstruction of lactiferous ducts.

Applicable Range

1. Those who have accessory breast and unsatisfactory breast shape

2. Those who have nodules on breasts, slight hyperplasia and distending pain in breast during the menstruation
3. Those who have free fat, saggy breast and outward expansion of breasts
4. Those who have low immunity
5. Those who suffer from irregular menstruation, speckles on the face and lack of elasticity of breasts
6. Those who think that their breasts are underdeveloped, or who have postpartum breast atrophy, breast relaxation, blockage of lactiferous ducts and so on.

Inapplicable Range

1. Patients with cardiovascular and cerebrovascular diseases, diabetes, abnormal blood coagulation and impaired function of important organs.
2. Those who are taking anticoagulants, vasodilators, corticosteroids and other drugs or who have been taking them for a long time.
3. Those with a focus of infection on the skin of the chest.
4. Patients with severe hyperplasia, fibroma and cyst of the chest
5. Those who are in pregnancy and lactation

Do's and Don'ts after Operation

1. Keep warm after operation. Do not eat cold food and do not get a cold.
2. Take shower in 4-6 hours
3. Drink more hot water to keep hydrated and speed up metabolism.
4. Do not overeat or stay up late.
5. Avoid sauna, hot spring or strenuous exercise for 7 days after operation.
6. Wear shaping and comfortable bras. Do not squeeze breasts too hard.

Part II

1. Detailed Operation

1. Install all fittings on the machine, put handles into the corresponding holders.
2. Connect the funnel to the water inlet and open the lid of the outlet before pouring distilled water or pure water.
3. Pour water into the funnel until water comes out from the outlet. And then remove the funnel, put the lid on the outlet.

After checking all handles are connected properly, the starting interface will appear when the machine is plugged and started.

1. Function Selection

time display and adjustment

home button

reset button

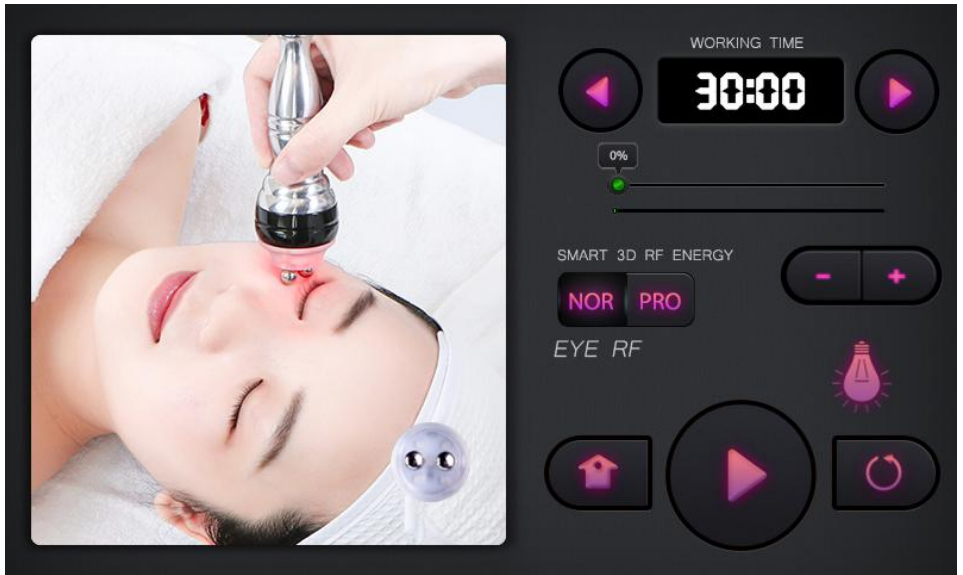

stop/stop button

2. Detailed Operation of Eye RF

choose **EYE RF** to enter the following interface

time display and adjustment

preset energy level

dynamic energy level of the handle

buttons for adjusting energy level

mode selection

Fixed mode, the red light is on and the energy of the handle directly reaches preset level after the start button is pressed

Smart mode, the energy of the handle slowly reaches preset level after the start button is pressed and the red light is on after the handle touches skin.

button for turn on or off the red light on the handle

3. Detailed Operation of Body RF

choose **BODY RF** to enter the following interface

time display and adjustment

preset energy level

dynamic energy level of the handle

buttons for adjusting energy level

mode selection

Fixed mode, the red light is on and the energy of the handle directly reaches preset level after the start button is pressed

Smart mode, the energy of the handle slowly reaches preset level after the start button is pressed and the red light is on after the handle touches skin.

button for turn on or off the red light on the handle

4. Detailed Operation of 40K

choose **40K UNOISETION** too enter the following interface

time display and adjustment

energy level display

buttons for adjusting energy level

mode selection

Constant working mode, suitable for those who have thick fat accumulation

Discontinuous working mode, suitable for those who want to reduce fat on specific areas and shape body.

5. Detailed Operation of Vacuum&Cooling

choose **COOLING HEAD** to enter the following the interface.

time display and adjustment

temperature display and adjustment(recommended temperature: -5°C to 3°C. 5°C is recommended for the first-time users. After they adapt to it, the temperature can be lowered slowly.

Knob for adjusting suction of the vacuum&cooling handle. Adjust it based on the users' endurance. Set the suction at the lowest level at the beginning and raise it slowly after they adapt to it.

1. Technical Parameters

Rated input voltage:AC220V-240V 50HZ /AC110V-120V 60Hz

Rated input power:350VA

Cool cold slimming Vacuum

Power:Up to 200W

Cooling device output temperature:5~ -5°C

Cooling device output :0-5Kpa

Cooling liquid: pure water

Cavitation frequency : 40KHz

Cavitation Power:up to 60W

Cavitation tip:60mm diameter

RF for BODY

RF frequency:3MHz

RF power:up to 30W

RF for FACE

RF frequency:3MHz

3. User Contraindications

Some groups of people should be cautious about using this instrument. Please consult a doctor or a professional before using the instrument. The details are as follows:

1. Women in pregnancy or lactation
2. Those with heart diseases and pacemakers
3. Those with unhealed incisions or who are on the road to recovery.
4. Those with epilepsy, sever diabetes and hyperthyroidism
5. Those with malignant tumors, haemophilia and severe bleeding
6. Those with skin diseases and infectious diseases
7. Those who wear metal jewellery
8. Those with metal, plastic and silicone implants
9. Those who are taking or have long been taking anticoagulants, vasodilators, corticosteroids and other drugs

4. Dos and Don'ts

1. The plug with grounding pin must be used before the instrument is used and the power socket of the instrument is properly grounded.
2. Ensure that the voltage of the instrument is suitable. If the voltage of the local power supply is not stable, we suggest that the user add a voltage regulator with matching power between the mains and the instrument.
3. In order to ensure the treatment effect and normal service life of the instrument, please use the specified parts provided or suggested by the original manufacturer.
4. The instrument should not be placed in damp places or near water sources, and should not be directly exposed to sunlight.
5. Do not place the instrument near a strong heat source, as this may affect the life and normal use of the instrument.
6. Before treatment, please remove all metal objects from the body first, so as to avoid unexpected conditions and influence the curative effect.
7. Please restrain from using the device on eyes, thyroid, parathyroid, testicles, abdomen of pregnant women, and pacemakers.
8. Patients who are suffering from illness should consult with a doctor and gain permission from the doctor before using.
9. Please turn off the power switch of the device, and ensure that the total power supply of the device is turned off before the staff leaves after daily use, so as to ensure the safety of the electrical products.
10. When taking other weight-loss drugs, it is recommended to stop taking them for 1 to 2 months before treatment. Extension of the course of treatment is recommended if you wish to lose weight immediately.
11. Don't use the instrument on an empty stomach. After a full meal, wait at least 1 hour before taking this treatment.
12. Make sure the handle is in full contact with skin during operation in case skin is heated unevenly.
13. Set the energy at lowest level at the beginning and slowly raise it after the customer adapts to it.
14. The corresponding frostbite-proof membrane must be applied during the treatment. Do not

perform the treatment on dry skin or let the handle directly touch skin.

15. Clean the instrument with normal saline (do not use ethyl alcohol) after operation to ensure its cleanliness and hygiene and prolong its service life.

16. 40K handle should not be used on head, chest, breast, heart and back.

17. Use this machine or train the operators in strict accordance with instructions in the user manual.

1. Troubleshooting & Solutions

1. The instrument cannot be started, and the button light on the back of the instrument does not work?

A. Make sure the power cord is connected to the socket with normal power supply.

B. Whether the fuse on the back of the instrument is loose or blown.

1. The machine works for a while but then stops?

A. It may be because there is no strong water flow or the machine doesn't sense the presence of water flow.

B. Check whether there is enough water in the water container.

2. There is a red alert on the top right corner of the machine?

A. Please check whether the water level in the water container is low

B. Please check whether there is something wrong with the water container.

4. No RF output from the instrument?

A. Please check whether the cord connects the handle to the machine properly

B. Please check whether the treatment area has been cleaned. Grease or essential oil products may cause poor contact between the handle and human body to cause this problem.

5. Weakened RF output?

A. Please check whether the cord connects the handle to the machine properly

B. Please check whether non-conductive grease and other substances are on the treatment handle, which can cause poor contact between the handle and skin to weaken the output.

C. Please check whether the handle used is the one specified by the instrument.

6. I can start the instrument, but the screen shows erroneous message?

A. Please unplug the power plug behind the instrument and wait for about 1 minute before restarting the instrument.

B. If the above method cannot solve the problem, please contact the instrument dealer for assistance.

6. FAQs

1. Does the vacuum&cooling handle have side effects in reducing fat?

A: It is a totally non-invasive and painless. Based on the fact that adipose cells are more vulnerable to coldness than other cells, it can cool down adipose cells and remove them. What's more, it only targets adipose cells instead of other tissue, and so it will not cause damages to skin or muscles. The dead cells will be excreted from body through metabolism, so it has no side effects.

2. Is the vacuum&cooling treatment effective for reducing fat?

A: The triglyceride contained in fat can change its form into solid under the low temperature of 5°C. If the handle is put on the fat area, fat will quickly congeal into jelly-like substances. And

then the phagocytosis(phagocytes engulf and digest microorganisms and cellular debris) will happen. The dead cells will be treated as waste by the body and will be excreted through metabolism. In this way, it can help reduce fat on specific areas to shape body. So, it is effective in reducing fat.

3. Do we need to control our diet and take exercise after taking this treatment?

A: Yes, we should regularly take exercise and control our diet. Because this treatment only reduces fat in our body, but it can not promote our basal metabolic rate fundamentally. So, if we don't do so, we will regain fat.

4. How long can we see the effects after the treatment?

A: It depends on individual constitution and metabolism. Normally, you will see the effects in 4-6 weeks. And it takes about 3 month for you to see the most satisfactory effects. Based on the fact that adipose cells are vulnerable to coldness, this treatment can cool down and destroy adipose cells under the low temperature of 5°C, which can be excreted from body through metabolism. So, you should wait for some time to see the effects.

5. Why do we need to use special frostbite-proof membrane during the treatment?

A: The main constituent in this kind of membrane is organic molecules, which are concocted based on the characteristics of human skin. Clinical trials have shown that the use of the membrane in this treatment can effectively protect skin from frostbite.

6. Q: How long can I start seeing results of RF treatment?

A: Normally, you can see the treatment results that day when you take the operation or within one week. Skin collagen tissue is heated and then contracts, and you can obviously feel the sensation of skin being tightened. Because RF works to stimulate subcutaneous tissue to promote collagen regeneration, so the more you take the treatment, the more noticeable the effects will be.

7. Q: Is RF harmful to skin?

A: RF treatment is non-surgical operation. It stimulates collagen regeneration at the skin bottom and boosts metabolism, and therefore has no damage to the skin. Local redness and hotness are the normal conditions of accelerated blood circulation, which will be relieved after a moment. So there's no need to worry about that.

8. Q: Which one is better in terms of weight loss, liposuction or this machine?

A: The principle of liposuction is to suck out the excess fat in one part of the body through negative pressure suction so as to achieve the purpose of rapid weight loss. It's a surgical treatment requiring anesthesia and so there is recovery period, which has risks despite its immediate results. However, our instrument is risk-free without side effects. It can not only help you reduce fat but also stimulate collagen regeneration to lift and tighten skin. It can also build perfect curves by lifting skin, and accentuate women's sexual charm.

9. Q: Why does tinnitus occur?

A: It's because ultrasound comes with a high frequency vibration, which could go up to 20kHz. It penetrates into 20mm-deep skin fat layers through ultrasound focusing. Highly intensified ultrasound can cause high-speed friction among fat cells, which can heat and dissolve them. And during the process, sound may be produced so that customer will have the sensation of tinnitus.

10. Q: What is collagen?

A: Collagen is a kind of biological macro molecule substance, a kind of white, opaque and non-branched fibrous protein. It can supplement the nutrients needed by all layers of the skin,

enhance the collagen activity in the skin, retain moisture, nourish skin, slow down ageing, relieve facial relaxation, provide nutrients for the hair and so on. Collagen is a nutrient that human body must replenish to delay ageing. With the growth of age, collagen will gradually be lost. For women, collagen will begin to decrease since the age of 20. At the age of 25, collagen loss will reach its peak. At the age of 40, the collagen content is less than half of that one has at age of 18. It is the loss of collagen and water that causes the wrinkles on the face of the elderly. The breakage of collagen fibers and elastic fibers will cause skin tissue to be oxidized, atrophied and collapsed. The skin will be dry, wrinkled, flabby and inelastic. Therefore, in order to delay ageing, there must be plenty of collagen.

Treatment suggestions

A course of treatment consists of ten treatment sessions. After one session, skin will be firmed and hydrated with necessary nutrients absorbed. After a full course, skin will be lifted with glow. Two courses help increase skin smoothness and plumpness and make face contour clearer. Three courses help promote skin metabolism and detoxification, fade pigmented spots and brighten dull skin, prevent skin from sagging and ageing and make the collagen at the bottom layer of skin regenerate to leave skin rejuvenated,

smoothed and firmed.

Treatment Suggestions

It is recommended to take this treatment 2-3 times per week. After one treatment, eye area is lifted and firmed and blood circulation is accelerated. After one month, fine wrinkles and black circles are reduced and skin colour is brightened. After three months, skin in eye area is totally firmed and rejuvenated with glossiness. If the customers keep using this instrument, eye aging can be relieved and prevented.

Neck Care: 60 minutes once a week

Treatment Suggestions

One course of treatment consists of 4 treatment sessions. After one treatment, the conditions of redness, swelling, blood stasis, and numbness will disappear in 1-2 weeks. And in the second week, you will feel fat is reduced slowly. And obvious results will be seen in about 2 months. The fat will be averagely reduced by 22% in thickness. Of course, the effect varies for personal situation. After one course of treatment, fat on waist and abdomen will be greatly reduced. And skin will be tightened and waist curves will be noticeable. In the later stage, you can take the treatment once per two months to consolidate the effect.

Treatment Suggestions

One course of treatment consists of 4 treatment sessions. After one treatment, the conditions of redness, swelling, blood stasis, and numbness will disappear in 1-2 weeks. And in the second week, you will feel fat is reduced slowly. After one course of treatment, unwanted fat on hips will begin to disappear and skin will be tightened. Obvious results will be seen in about 2 months. Of course, the effect varies for personal situation. In the later stage, you can take the treatment once per two months to consolidate the effect.

Treatment Suggestions

One course of treatment consists of ten treatment sessions. After one treatment, there will be sensation of heat on the breast, blood circulation will be promoted and there will be some degree of lifting effect. After one course, the effect will be more obvious and the nodules will be relieved. After three courses, the skin will be firmed and the breast will be well shaped with increased elasticity. The functions of endocrine system will be improved to make females more attractive.
