

Vacuum Therapy Machine

- Promote the circulation of the body to effectively speed up the circulation of the lymphatic system, so that toxins can be discharged from the body and improve the immune function of the body.
- The breast enlargement device can exercise the elasticity of the breast tissue, thus achieving the effect of lifting the breast.
- Microwave vibrations create a natural breast exercise, which also allows the boobs to rapidly accumulate fat, allowing small, sagging breasts to develop again and reshape the fullness of the breasts.
- Matching product: Massage oil

One machine for multiple uses

1. Breast external extension

Due to improper squeeze, unfit bra size or unhealthy sleep habits.

2. Mastoptosis

It is mainly because of decrease in hormone and the loss of supportive tissue.

3. Breast Atrophy

Decreased levels of estrogen and progesterone and insufficient breast connective tissue after childbirth or breast-feeding

4. Breast left-right asymmetry

Imbalanced development of both breasts and improper exercise in daily life

5. Fat accumulation in butts

Various factors like a sedentary lifestyle contribute to the fat accumulation in hips, resulting in unattractively expanded waist curve.
